What is PEPC?

About PEPC

PEPC (Planning, Environment and Public Comment) is an online collaborative tool dedicated to facilitating the NEPA process in conservation planning, environmental impact analysis and informed decision-making. PEPC allows parks to improve efficiency and implement guidelines defined in Director's Order #12.

This tool supports the National Park Service's (NPS) project planning, compliance tracking, comment analysis and response, as well as public communication efforts. PEPC is designed by park representatives for:

- NPS employees and contractors involved in project creation and tracking, planning, cultural and natural compliance, site visits, documentation, comment coding, and/or responding to comments.
- National Office personnel, Regional Directors and Park Superintendents to view detail and summary reports of planned projects and funding status, compliance status of active projects, and trends in public comments.
- Interested and affected public, including internal and external agency contacts, to access and comment on notices, updates, documents, and policies throughout the planning process.

About This Guide

This guide will cover system elements and processes specific to the PEPC system. It was created from the online version that is provided within the system. As such, some information is repeated in more than one section.

Because online guides are not usually read from beginning to end – but can be referenced at any point from links within the system, it was necessary to have some information in more than one place so that it would be convenient for online users. Sections of the online version of the guide may be referenced from links within the PEPC system and within the guide itself.

The aim of this guide is to assist end users in navigating the PEPC system. In its explanations, this guide assumes a general familiarity with computers, Windows operating systems, some NPS terminology, and the Internet on the part of the user. It is assumed that the user of this guide will possess:

- A familiarity with a Windows interface and interface elements (radio buttons, list boxes, opening/closing windows).
- A familiarity with navigation using a WWW browser (clicking links, filling in forms, using buttons, breadcrumbs, scrolling).
- Some familiarity with NPS terminology.
- Some familiarity with NEPA terminology.

PEPC Overview

Introduction

PEPC includes functionality that may be accessed by the public as well as functionality that is available only to NPS employees and contractors. The general public can view project documents such as status and meeting notices and can submit comments. This **PEPC Guide** provides help for functionality that is available to NPS employees and contractors with a valid login.

To provide a solution-oriented NEPA process that balances NPS needs with social, economic, and natural and cultural environment considerations, you will find the following sections in the main navigation menu of PEPC:

Home Access all projects and parks with which you are associated.

Parks Find projects by park. Filter a list of all parks by Region, State, or just those parks with which you are associated.

Projects Find projects. Filter a list of all projects by Region, Park, Project Type, NEPA Type, or just those projects with which you are associated.

Reports View reports on projects, planning, demographics, management, and cooperating agency status.

Projects/Search Search for a project based on specified criteria.

Tools Access useful links and the **PEPC Guide**.

Admin Create and maintain user profiles, access lookup tables and administration reports, and manage links.

Logout Exit the PEPC system.

NOTE: The PEPC system includes some functionality that operates interactively with Microsoft Word and Microsoft Excel. This functionality has been tested with versions 2000 and XP of Word and versions 97, 2000 and XP of Excel. Functionality with other versions of these Microsoft Office products cannot be guaranteed.

Home

Your Home page provides easy access to projects and parks with which you are associated or have an interest. The **My Projects** table lists projects of status "Proposed" or "In Process" to which you are assigned as Project Leader, NHPA Specialist, NEPA Specialist, or IDT Member. The My Closed Projects table lists parks with which you are associated through your user profile. The **My Parks** table lists parks with which you are associated through your user profile. Go to PEPC Guide PEPC Overview: Admin for further information on associating parks through your user profile.

Create a Project

STEP 1. Click on the **Create Project** link at the top right of the screen.
STEP 2. Go to **PEPC Guide Project Planning & Public Communication:Step 1** for further information.

View Project Detail

STEP 1. Choose a project from the **My Projects** table or the **My Closed Projects** table and click on its **Project ID** link.
STEP 2. View details for the project selected.

View Park Information

STEP 1. Choose a park from the **My Parks** table and click on its **Park Code** link.
STEP 2. View information for the park selected.

Parks

The Parks section lists all parks in the PEPC system. Selecting a park from the list takes you to that park's Home page. From the Park Home page you can view, edit, or create projects and public requests. If the park has a public Home page, there will be a link to it here.

View Parks

By default the Park List contains a list of all parks in the PEPC system. To assist in finding the park in which you are interested, the list can be narrowed using Filters.

STEP 1. The following filters are available:

Filter	Notes
My Parks	Displays only those parks with which you are associated through your user profile. See **PEPC Guide:PEPC Overview Admin** for information on associating parks through your user profile.
Region	Select the Region radio button and then select the region from the dropdown list of region choices.
All Parks	Displays a list of all parks in the PEPC system. "All Parks" is selected by default.
State	Select the State radio button and then select the state from the dropdown list of state choices.

STEP 2. Click on **Search**
STEP 3. The **Park List** is filtered according to the criteria selected.

View Projects in a Park

STEP 1. Click on the **Park Code** in the **Park List** table.
STEP 2. The Park Home page is displayed. It contains a **Projects** list.

STEP 2.1 By default the **Projects** list contains a list of all projects for the park selected. To assist in finding the project in which you are interested, the list can be narrowed using Filters. The following filters are available:

Filter	Notes
Project ID	Enter the Project ID if you know it.
Project Type	Select a project type from the dropdown list.
NEPA Type	Select a NEPA type from the dropdown list.
Target Start From	Using the mm/dd/yyyy format, enter the Target Start From date to include projects with a Target Start date occurring on or after this date.
Target Start To	Using the mm/dd/yyyy format, enter the Target Start To date to include projects with a Target Start date occurring on or before this date.

STEP 2.2 Click on **Search**.
STEP 2.3 The **Projects** list is filtered according to the criteria selected.

View Project Details

STEP 1. Follow the steps in View Projects in a Park in this section.
STEP 2. Click on the ID in the Projects table.
STEP 3. The Project Home page is displayed. It contains project details.

View Public Requests for a Park

STEP 1. Follow the steps in **View Projects in a Park** in this section.
STEP 2. Click on the **Public Requests** link in the left navigation menu.

STEP 2.1 By default the **Public Request List** contains a list of all public requests for this park. To assist in finding the public request in which you are interested, the list can be narrowed using Filters. The following filters are available:

Filter	Notes
Request Type	**All** is automatically selected. To narrow down the list, select a request type from the list box.
Status	**All** is automatically selected. To narrow down the list, select a status from the list box.
Project ID	Enter the Project ID if you know it.
Date From	Using the mm/dd/yyyy format, enter the Date From date to include requests with a request date occurring on or after this date.
Date To	Using the mm/dd/yyyy format, enter the Date To date to include requests with a request date occurring on or before this date.

STEP 2.2 Click on **Filter.**
STEP 2.3 The **Public Request List** is filtered according to the criteria selected.

STEP 3. Click on the **ID** link in the **Public Request List.**
STEP 4. The Public Request is displayed. It contains Correspondence, Author, Request, and Status.

Create a Request

Requests can only be created or edited in **Step 7: Public Documents & Comment Analysis > Correspondence** as related to a document. The public site no longer allows generic requests.

Projects

The Projects section provides a way to locate a project and access details for that project.

Projects/Search

By default the **Project List** contains a list of all projects in the PEPC system. To assist in finding the project in which you are interested, the list can be narrowed using Filters.

STEP 1. The following filters are available:
STEP 2. Click on **Search**.
STEP 3. The **Project List** is filtered according to the criteria selected.

Filter	Notes
Project ID/PIN	Enter the project ID of the project you wish to view.
PMIS ID(s)	Enter the PMIS ID(s) which was entered into PEPC for for the project
Region	Select the Region radio button and then select the region from the dropdown list of region choices. The list will only include projects within the selected region.
Park	Select the Park radio button and then select the park from the dropdown list of park choices. The list will only include projects within the selected park.
Project Statue	Select a project status from the dropdown list. The list will only include projects of the type selected.
Project Type	Select a project type from the dropdown list. The list will only include projects of the type selected. The list includes projects of all project types by default.
Project Category	Select a project category from the dropdown list. The list will only include projects of the category selected. The list includes projects of all project types by default.
NEPA Type	Select a NEPA type from the dropdown list. The list will only include projects with a NEPA type of the type selected. The list includes projects of all NEPA types by default.
Sensitive	Select the Sensitive dropdown list to select All, Sensitive projects (YES) or Non-Sensitive Projects (NO).
NHPA Level of Effect	Select an NHPA Level of Effect from the dropdown list. The list will only include projects with an NHPA Level of Effect of the type selected. The list includes projects of all NHPA Levels of Effect by default.
NHPA Documentation Method	Select an NHPA Documentation Method from the dropdown list. The list will only include projects with an NHPA Documentation Method of the type selected. The list includes projects of all NHPA Documentation Method types by default.
Compliance Status	Select the Compliance Status from the dropdown list. The list will only include projects of the status selected.
Target Start Date From	Using the mm/dd/yyyy format, enter a Target Start Date to include projects with a target or actual start date occurring on or after this date.
Target Start Date To	Using the mm/dd/yyyy format, enter a Target Start Date to include projects with a target or actual start date occurring on or before this date.
Text	Enter text to search project titles and project descriptions. The search results will return projects that include the entered text in the project title, secondary title, or project description. For example: If you enter "tree" the system will return all projects that contain the word or string "tree" in the project title or project descriptions. This could include a project with the title "Removal of Trees" or description "...remove 4 trees from…".

View Project Details

STEP 1. Click on the **ID** in the **Project List** table.
STEP 2. The **Project Home** page is displayed. It contains project details.

Edit Project Details

STEP 1. Click on the **ID** in the **Project List** table.
STEP 2. The **Project Home** page is displayed. It contains project details.
STEP 3. Project details can be edited using the links in the left navigation. See **Project Planning and Public Communication** for more information on editing project details.

Reports

The Reports section includes reports that provide a summary of projects across regions, parks and nationally. This section does not include project specific reports that are used for comment analysis and response. See **PEPC Guide, Project Planning & Public Communication: Step 7:** for more information regarding comment analysis and response reports.

All reports may be printed. Most reports give the user the option of printing in HTML, Microsoft Excel, or Microsoft Word formats. Choosing the appropriate link will open the report in the selected application. Some of the reports can be quite large and are likely to span multiple pages. It is recommended that reports be formatted before printing for a better result. Reports can be formatted from within most applications using the print preview feature. If you are unfamiliar with the print preview feature, consult the documentation of the application you are using for further assistance. It is recommended that reports be printed in landscape mode for optimum results.

Ad Hoc Report

Run this report to review projects by criteria you select.

STEP 1. The report can be run by region or park using the following filters:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Division /Office	Select a Division from the dropdown list to limit the report by division.
NEPA Type	Select a NEPA type from the dropdown list to limit the report by NEPA type.
Project ID	Enter a project ID to limit the report to a specific project.
NHPA Doc. Method	Select a type of NHPA documentation method from the dropdown list to limit the report by NHPA documentation method.
Project Title	Enter text to filter the report by project title containing specific word(s). You can enter multiple words but they will be treated as an exact phrase, for example if your enter 'Permit for' (without single quotes) you will pull all projects with the phrase 'Permit for' in the project title. However, if you enter 'for Permit' (without single quotes) it does not search titles for both of these words, no matter what order, it only searches for titles containing the exact phrase 'for Permit'.
NHPA Determination of Effect	Select a type of NHPA determination of effect from the dropdown list to limit the report by NHPA Determination of Effect.
Project Description	Enter text to filter the report by project description containing specific words. You can enter multiple words but they will be treated as an exact phrase, for example if your enter 'existing signage' (without single quotes) you will pull all projects with the phrase 'existing signage' in the project description. However, if you enter 'signage existing' (without single quotes) it does not search descriptions for both of these words, no matter what order, it only searches for descriptions containing the exact phrase 'signage existing'.
Project Category	Select a type of Project Category from the list box to limit the report to projects with a specific project category. You can select multiple categories by using the <CTRL> key.
Project Type	Select a Project type from the dropdown list to limit the report to projects of a specific project type.
Project Status	Select a Project Status type from the dropdown list to limit the report to projects of a specific project status.
FMSS Work Order #	Enter the FMSS Work Order number to filter the report for a specific FMSS work order#.
FMSS Asset Number	Enter the FMSS Asset number to filter the report for a specific FMSS Asset number.
Funding Status	Select a funding status from the dropdown list to limit the report by Funding Status.
Funding Source	Select a source of the funding from the list box to limit the report by Funding Source.
PMIS ID(s)	Enter the PMIS ID(s) to filter the report for specific PMIS numbers, you can enter multiple PMIS IDs separated by a comma.

Construction Start From and To	Using the mm/dd/yyyy format, enter the 'Construction Start Date From' date and a 'Construction Start Date To' date to include projects with construction start dates occurring between a range of dates.
Day Labor Start From and To	Using the mm/dd/yyyy format, enter the' Day Labor Start Date From' date and a 'Day Labor Start Date To' date to include projects with Day Labor start dates occurring between a range of dates.
Target Project Start From and To	Using the mm/dd/yyyy format, enter the 'Target Project Start Date From' date and a 'Target Project Start Date To' date to include projects with a start date occurring between a range of dates.
Project Creation Start From and To	Using the mm/dd/yyyy format, enter the 'Project Creation Start Date From' date and a 'Project Creation Start Date To' date to include projects with a creation date occurring between a range of dates.
Compliance Completion Start From and To	Using the mm/dd/yyyy format, enter the 'Compliance Completion Start Date From' date and a 'Compliance Completion Start Date To' date to include projects with a compliance complete date occurring between a range of dates.
ESF Initiation Start From and To	Using the mm/dd/yyyy format, enter the 'ESF Initiation Start Date From' date and a 'ESF Initiation Start Date To' date to include projects with an ESF initiated date occurring between a range of dates.
ESF Completion From and To	Using the mm/dd/yyyy format, enter the 'ESD Completion Start Date From' date and a 'ESF Completion Start Date To' date to include projects with an ESF completed date occurring between a range of dates.
Construction Status	Select a construction status from the dropdown list to filter the report by construction status.
Compliance Status	Select a compliance status from the dropdown list to filter the report by compliance status.
Day Labor	Check the checkbox to include projects with Day Labor.
Contract Labor	Check the checkbox to include projects with Contract Labor.
Project Leader	Select the name of the Project Leader using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. 5. Click **Select**. The person's name appears on the form in the name field.
Contractor Name	Select the name of a Contractor or Consultant using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. 5. Click **Select**. The person's name appears on the form in the name field.
Contract Number	Enter the contract number on which to filter the report.
NEPA Specialist	Select the name of a NEPA Specialist using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. 5. Click **Select**. The person's name appears on the form in the name field.
NHPA Specialist	Select the name of a NHPA Specialist using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**.

	4. Click in the radio button associated with the name you wish to use. 5. Click **Select**. The person's name appears on the form in the name field.
Archeological Survey	Select Yes or No from pulldown
Archeological Survey Complete From and To	Enter the dates
County	Enter the County on which to filter the report.
State	Enter the State on which to filter the report.
District	Enter the District on which to filter the report.
Section	Enter the Section on which to filter the report.
Geo Marker Marker Type	Enter the Geo Marker and Marker type on which to filter the report.

STEP 2. **Report Header**. You can type in your desired Report header.
STEP 3. Select **Fields to Display**. Choose a field by clicking on it to highlight the field and then click the '**Add Field** >>' button. The field will then appear in the box to the right.
STEP 4. **Column Order**. You can then click on a field in the box on the right and either remove it by clicking the '<< **Remove Field**' button, or move the field up or down by clicking the '**Move Up**' or '**Move Down'** buttons. until the fields are in the order you want the report columns to display from left to right.
STEP 5. **Sort Order**. You can choose up to 3 fields by which to sort your data. Select the main field to sort on in the '**First Sort'**, choose whether to sort ascending or descending. Select the secondary sort in the '**Second Sort'**. Select ascending or descending. Select the tertiary sort by selecting the '**Third Sort'** and select ascending or descending.
STEP 6. Lastly click either **HTML** or **Excel** to generate the report in the format you wish to have the report.

Cooperating Agency Status

Run this report to view the status of the relationship with cooperating agencies.

STEP 1. Initially the **Cooperating Agency Status Report** displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Compliance Completion Date, From and To	Enter the dates for these items
Fiscal Year	Select button for fiscal year
NEPA Type	Select a type of NEPA compliance documentation by checking the appropriate choice.
Include EIS Dates	Check box, if applicable

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in Microsoft Excel format. Links for this file type appear between the Report Criteria and Report Results sections of the report.

Demographics

Run this report to determine the demographic composition of the public response for all feedback for a park, project or specific document.

STEP 1. Select one or a combination of the following report criteria:

Filter	Notes
Park*	Select a park from the dropdown list (required).
Project ID	Enter the project ID of a project to limit the report to a specific project.
Document ID	Enter the document ID of a document to limit the report to a specific document.
Correspondence ID	Enter the Correspondence ID for a specific item.
Organization Type	Select a type from the dropdown list.
Receipt Date	Using the mm/dd/yyyy format, enter the 'Receipt Date From' date and a 'Receipt Date To' date to include projects with an date received occurring between a range of dates.
Fields to show	Select the items to show in the report: Name, Address, Email, Organization, Project Title, and Correspondence. Under Correspondence: None - does not show the correspondence text, All - will display ALL correspondence including all form letters, and matches to those form letters (Could be long!). Non-form letter - will display the individual correspondence and the Master form letter text only (best choice for reporting).

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either Microsoft Word or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

General Management Plan Summary

Run this report to review general management plan projects across regions, parks, or nationally. This report is limited to projects where the project type is General Management Plan (GMP).

STEP 1. Initially the General Management Plan Summary report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Project Status	Select a project status from the dropdown list to limit the report by project status.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Planning Summary

Run this report to review project status, project or NEPA type for a region, across regions or for a specific park.

STEP 1. Initially the Planning Summary report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.

Project Status	Select a project status from the dropdown list to limit the report by project status.
Project Type	Select a type of project from the dropdown list to limit the report by project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report by NEPA type.

STEP 2. Click Generate Report.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Projects by ARCH Survey

Run this report to review projects by Archeological study status.

STEP 1. Initially the Projects by ARCH Survey report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Project Type	Select a type of project from the dropdown list to limit the report by project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report by NEPA type.
Start Date From	Using the mm/dd/yyyy format, enter the Start Date From date to include projects with a target start date occurring on or after this date.
Start Date To	Using the mm/dd/yyyy format, enter the Start Date To date to include projects with a target start date occurring on or before this date.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Projects by Funding Status

Run this report to review projects by funding status.

STEP 1. Initially the Projects by Funding Status report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Project Type	Select a project type from the dropdown list to limit the report by project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report by NEPA type.
Funding Status	Select a funding status from the list box to limit the report by Funding Status.
Funding Source	Select a source of the funding from the dropdown list to limit the report by Funding Source.
Target Start From	Using the mm/dd/yyyy format, enter the Start Date From date to include projects with a start date occurring on or after this date
Target Start To:	Using the mm/dd/yyyy format, enter the Start Date To date to include projects with a start date occurring on or before this date
PMIS ID(s)	Enter PMIS ID(s) as entered into PEPC Step 2 Funding.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Projects by IDT Member

Run this report to review projects by Interdisciplinary Team (IDT) member.

STEP 1. Initially the Projects by IDT Member report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
IDT Member	Select the name of an IDT Member using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. 5. Click **Select.** The person's name appears on the form in the name field.
Project Type	Select a project type from the dropdown list to limit the report to project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report to NEPA type.
Start Date From	Using the mm/dd/yyyy format, enter the Start Date From date to include projects with a start date occurring on or after this date
Start Date To	Using the mm/dd/yyyy format, enter the Start Date To date to include projects with a start date occurring on or before this date

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected. This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Project Status

Run this report to review projects by project status.

STEP 1. Initially the Project Status report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the search results to projects associated with parks in a specific region. Leave the dropdown list blank to include projects in all regions. Select a park from the dropdown list to limit the search results to projects associated with a specific park. Leave the dropdown list blank to include projects in all parks.
Project Status	Select a project status from the dropdown list to limit the search results to project status.
Compliance Status	Select a compliance status from the dropdown list to limit the report by project status.
Project Type	Select a project type from the dropdown list to limit the report by project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report by NEPA type.

Project Start Date From	Using the mm/dd/yyyy format, enter the Project Start Date From date to include projects with a target or actual start date occurring on or after this date.
Project Start Date To	Using the mm/dd/yyyy format, enter the Project Start Date To date to include projects with a start date occurring on or before this date.
Project Completion Date From	Using the mm/dd/yyyy format, enter the Project Completion Date From date to include projects with a completion date occurring on or after this date.
Project Completion Date To	Using the mm/dd/yyyy format, enter the Project Completion Date To date to include projects with a completion date occurring on or before this date.
Compliance Completion Date From	Using the mm/dd/yyyy format, enter the Compliance Completion Date From date to include projects with a completion date occurring on or after this date.
Compliance Completion Date To	Using the mm/dd/yyyy format, enter the Compliance Completion Date To date to include projects with a completion date occurring on or after this date.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Public Documents

Run this report to review projects which have been public documents.

STEP 1. Initially the Public Documents report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Review Status	Select the status you wish to filter by, the default is '**All**'.
Project Type	Select a project type from the dropdown list to limit the report by project type.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

Sensitive Projects

Run this report to review projects which have been marked sensitive.

STEP 1. Initially the Sensitive Projects report displays all results within the PEPC system. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the search results to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the search results to projects associated with a specific park. Select **All** to view all projects.
Project Status	Select the status you wish to filter by, the default is 'All'.
Project Type	Select a project type from the dropdown list to limit the report to project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report by NEPA type.
Start Date From	Using the mm/dd/yyyy format, enter the Target Start Date From date to include projects with a target start date occurring on or after this date.
Start Date To	Using the mm/dd/yyyy format, enter the Target Start Date To date to include projects with a target start date occurring on or before this date.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

Tasks by IDT Member

Run this report to review tasks by Interdisciplinary Team (IDT) member.

STEP 1. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Project ID	Enter the Project ID/PIN for the project.
IDT Member	Select the name of an IDT Member using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. 5. Click **Select.** The person's name appears on the form in the name field.
Responsibility	Select the Responsibility from the dropdown list, based on discipline to limit the report by responsibility.
Project Status	Select the Status of the project to limit the report by project status.
Task Completion Status	Select the task completed status to limit the report to a task completed status.
Project Type	Select a project type from the dropdown list to limit the report to project type.
NEPA Type	Select a type of NEPA compliance documentation from the dropdown list to limit the report to NEPA type.
Task Due Date From	Using the mm/dd/yyyy format, enter the Task Due Date From date to include tasks with a due date occurring on or after this date.
Task Due Date To	Using the mm/dd/yyyy format, enter the Task Due Date To date to include tasks with a due date occurring on or before this date.
Task Completion Date From	Using the mm/dd/yyyy format, enter the Task Completed Date From date to include tasks with a completed date occurring on or after this date.
Task Completion Date To	Using the mm/dd/yyyy format, enter the Task Completed Date To date to include tasks with a completed date occurring on or before this date.

STEP 2. Click **Generate Report**.

STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either HTML or Microsoft Excel format. Links for these file types appear between the Report Criteria and Report Results sections of the report.

The American Recovery and Reinvestment Act (ARRA) Report

Run this report to review ARRA projects.

STEP 1. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.

PMIS ID(s)	Enter PMIS ID(s) as entered into PEPC Step 2 Funding.
PEPC ID	Enter the PEPC project ID number.
NEPA Type	Check the appropriate box or boxes to limit the report by NEPA Types. The default has all boxes checked.
Compliance	Check the appropriate box, the default has all boxes checked.
Fund Source	Check a source of the funding to limit the report by Funding Source.
In-Target	Check appropriate box.
Withdrawn	Check Yes or No

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in Microsoft Excel format.

NHPA Report

Run this report to create NHPA Year end Report.

STEP 1. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Region **OR** Park	Select a region from the dropdown list to limit the report to projects associated with parks in a specific region. Select **All** to view all projects. Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
PEPC ID	Enter the PEPC project ID number
From	Using the mm/dd/yyyy format, enter the From date to include tasks with a completed date occurring on or after this date.
To	Using the mm/dd/yyyy format, enter the To date to include tasks with a completed date occurring on or before this date.

STEP 2. Click **Generate Report**.
STEP 3. A report is produced based on the report criteria selected.

This report may also be viewed and printed in either Microsoft Excel format or Screen view.

Media Report

Run this report to create the How Did You Hear Report.

STEP 1. The report criteria can be narrowed by selecting one or a combination of the following report criteria:

Filter	Notes
Park	Select a park from the dropdown list to limit the report to projects associated with a specific park. Select **All** to view all projects.
Project ID	Enter the PEPC project ID number.
Document ID	Enter the document ID number

STEP 2. Click G**o**.
STEP 3. A report is produced based on the report criteria selected.

This report may be viewed in Screen view.

Search

The Search section allows you to locate a project within the PEPC system using specific search criteria.

STEP 1. The following filters are available:
STEP 2. Click on **Search**.
STEP 3. The **Project List** is filtered according to the criteria selected.

Filter	Notes
Project ID/PIN	Enter the project ID of the project you wish to view.
PMIS ID(s)	Enter the PMIS ID(s) which was entered into PEPC for for the project
Region	Select the Region radio button and then select the region from the dropdown list of region choices. The list will only include projects within the selected region.
Park	Select the Park radio button and then select the park from the dropdown list of park choices. The list will only include projects within the selected park.
Project Statue	Select a project status from the dropdown list. The list will only include projects of the type selected.
Project Type	Select a project type from the dropdown list. The list will only include projects of the type selected. The list includes projects of all project types by default.
Project Category	Select a project category from the dropdown list. The list will only include projects of the category selected. The list includes projects of all project types by default.
NEPA Type	Select a NEPA type from the dropdown list. The list will only include projects with a NEPA type of the type selected. The list includes projects of all NEPA types by default.
Sensitive	Select the Sensitive dropdown list to select All, Sensitive projects (YES) or Non-Sensitive Projects (NO).
NHPA Level of Effect	Select an NHPA Level of Effect from the dropdown list. The list will only include projects with an NHPA Level of Effect of the type selected. The list includes projects of all NHPA Levels of Effect by default.
NHPA Documentation Method	Select an NHPA Documentation Method from the dropdown list. The list will only include projects with an NHPA Documentation Method of the type selected. The list includes projects of all NHPA Documentation Method types by default.
Compliance Status	Select the Compliance Status from the dropdown list. The list will only include projects of the status selected.
Target Start Date From	Using the mm/dd/yyyy format, enter a Target Start Date to include projects with a target or actual start date occurring on or after this date.
Target Start Date To	Using the mm/dd/yyyy format, enter a Target Start Date to include projects with a target or actual start date occurring on or before this date.
Text	Enter text to search project titles and project descriptions. The search results will return projects that include the entered text in the project title, secondary title, or project description. For example: If you enter "tree" the system will return all projects that contain the word or string "tree" in the project title or project descriptions. This could include a project with the title "Removal of Trees" or description "...remove 4 trees from…".

Tools

Use the tools page to find information to help you accomplish your planning goals.

PEPC Guide
You can access the online version of the PEPC Guide by selecting **HTML Format** under **PEPC Guide.** The **PEPC Guide** is an online series of help pages relating to each of the PEPC pages. Look for the task that you need to perform and find step-by-step instructions for accomplishing your task. You can also download the pdf format of the PEPC Guide for printing.

Aids/Training Materials
There are 6 Quick Start Guides which will help you based on your PEPC responsibility.

E-Courses
There are 5 E-courses on DOI Learn which are excellent tools performing your PEPC tasks. It is HIGHLY recommended each PEPC user takes the "Introduction to PEPC"course. Additional courses should be taken as they apply to your PEPC responsibility.

Additional Links
Additional tools may be added to this section. If there are tools you would like added, please contact the system administrator.

Admin

The Administration (Admin) section provides access to user profile management, lookup tables, link management, and administrative reports. Users have access to differing functionality within the Admin section based on their user type and their assigned roles.

Create/Modify User Profiles

All users may edit their own profile. Administrators may edit their own profile as well as the profiles of other users. The form used to create a user, edit your own profile, and edit another user's profile contains the same fields. These fields are described in the tables below.

Edit your own profile: From the Administration Home page select the **My User Profile (Edit)** link in the left navigation. Edit the form using the fields described in the tables below.

Edit another user's profile -(Park or Region PEPC Administrators): From the Administration Home page select the User Profiles link in the left navigation.

> **NOTE:** The search defaults to the unit you have access for (park or region). If you searching for a user who was previously at another park/unit, make sure '**All**' is selected in the park list. You can search by last name only, or just a portion of the last name, if you are unsure of the spelling.

Select the Edit link that corresponds to the user whose profile you wish to edit. (Select the user's name to view profile information without making changes.) Edit the form using the fields described in the tables below.

Create a new user: From the Administration Home page select the **Create User** link in the left navigation. Complete the form using the fields described in the tables below. Create a new user: From the Administration Home page select the **Create User** link in the left navigation. Complete the form using the fields described in the tables below.

STEP 1. Enter or modify basic user information using the fields below:

Filter	Notes
User Status	**Active** should be selected to allow access to PEPC. To prevent access to PEPC, deselect the check box. (Only Region Administrators or PEPC System Administrators may change a User Status.)
User Type	Select an option using the radio button. (Only Administrators or Superusers may change a User Type.) **Superuser** – for full access and edit capabilities **General** – for read-only access to all projects servicewide. This is a standard role for regions and park users! **Specific Project Access** –for limited project level access and edit capabilities. Funding information is not available. This is typically used for contractors and consultants.
Person*	This is the name of the person for whom the profile is created (required when creating a new user). This may be edited to assign this profile to another user. Select a name using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. **NOTE:** *PEPC has email functionality for many notices/reminders. Please make sure to verify the person's email address in the standard email program before adding it here.* b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Username*	Name that user will use to login to PEPC (required when creating a new user). The Username is limited to 15 alphanumeric characters and must start with a letter. This field may not be edited once a user profile has been created.

STEP 2. Complete the **Add to 'My Parks' List** form using the fields described below.

NOTE: Parks that are added to the 'My Parks' List will appear on the user's Home page.

Filter	Notes
Park	1. Select a park from the dropdown list. 2. Click **Add My Park(s)**. The selected park appears in the List of '**My Parks**' table. 3. Continue adding parks until all desired parks are listed. To select multiple parks, hold down the "Ctrl" key while clicking. The parks included will appear in **My Parks** on the user's home page. 4. Click **Save** to save **-OR- Cancel** to exit without saving changes. **NOTE:** To delete a park from the list select its Delete check box. The Park will be deleted when the form is saved.

STEP 3. Assign a PEPC Region Role for one or more Regions, if appropriate. See **PEPC Guide Appendix D: Roles and Permissions** for more information.

STEP 3.1 Complete the ***Add Region Role*** form using the fields described below:

Filter	Notes
Role	Select a role from the dropdown list.
Region	Select a region from the dropdown list.

STEP 4. Assign a PEPC Park Role for one or more Parks, if appropriate. See **PEPC Guide Appendix D: Roles and Permissions** for more information.

STEP 4.1 Complete the ***Add Park Role*** form using the fields described below:

Filter	Notes
Role	Select a role from the dropdown list.
Region	Select a region from the dropdown list.

STEP 4.2 After both a Park Role and a Park are selected, click **Add Park Role(s)**. The selected Park Role and Park appear in the **List of Park Roles** table.

NOTE: Only Administrators may add Park Roles. Non-administrator users may only request that a role be added. Selecting a Park Role will change the Status to "Requested" and the Activate and Delete check boxes described below will not be available. When a user requests a role, an e-mail notification is sent to the administrator. When the request is granted by the administrator, an e-mail notification is sent to the user. See **PEPC Guide Appendix A: E-mail Notifications** for more information.

NOTE: The Activate check box is automatically selected. To deactivate the park role, deselect the Activate check box. The change will take effect when the form is saved.

NOTE: To delete a Park Role association, select the Delete checkbox. The Role will be deleted when the form is saved.

STEP 5. Assign a PEPC Project Role for one or more Projects, as appropriate. See **PEPC Guide Appendix D: Roles and Permissions** for more information.

STEP 5.1 Complete the **Add Project Role** form using the fields described below:

Filter	Notes
Role	Select a role from the dropdown list.
Region	Select a region from the dropdown list.

STEP 5.2 After both a Project Role and a Project ID are entered, click **Add Project Role**. The selected Project Role and Project ID appear in the **List of Project Roles** table.

NOTE: Only Administrators or Superusers may add Project Roles. Non-administrator users may only

request that a role be added. Selecting a Project Role will change the Status to "Requested" and the Activate and Delete check boxes described below will not be available. When a user requests a role, an e-mail notification is sent to the administrator. When the request is granted by the administrator, an e-mail notification is sent to the user. See **Appendix A: E-mail Notifications** for more information.

NOTE: The Activate check box is automatically selected. To deactivate the region role, deselect the Activate check box. The change will take effect when the form is saved.

NOTE: To delete a Project Role association, select the Delete checkbox. The Role will be deleted when the form is saved.

STEP 6. Complete the **Set Password** form using the fields described below:

Filter	Notes
Password*	This field is used to create or modify the user's password (required when creating a new user). If you do not wish to change the current password, it may be left blank. To change the password, enter the new password here. **Note:** Password must be at least 8 characters, and contain a mix of at least three of the following categories: uppercase lowercase numeric characters and special (non-alphanumeric) characters. Password must not be the same as the user ID Password must not be names or words. An example: TGIF!2Day
Confirm Password*	This field is used for verification of a password change (required when creating a new user). If you entered anything in the **Password** field, you must also enter the same text here.

STEP 7. Click **Save** to save changes to the database. Any changes made to Regions, Parks and Projects will now be reflected the **User Profile** page.
-OR-
Click **Cancel** to exit without saving changes and return to **User Profile.**

NOTE: When a new account is created, the following message is sent to the E-mail address of the account user:
A user account was created on the Planning, Environment and Public Comment System (PEPC):
Username: <username>
Password: <password>
Please logon to PEPC and change your password at the following URL: https://pepc.nps.gov/

Reset User Password

STEP 1. From the **Administration Home** page, select the **User Profile List** link in the left navigation.
STEP 2. Click on the **Reset** link in the **Reset Password** column of the user whose password you wish to reset. You will be prompted "Are you sure you want to reset the password of <User Name>?
STEP 3. Click **OK.** A message will be sent to that user's e-mail address: Your password on the PEPC system was reset. Your new password is: <system assigned alphanumeric password>
Please logon to PEPC and change your password at the following URL: <URL for user to log into PEPC using system assigned alphanumeric password>
- OR - Click **Cancel** to exit without saving changes and return to **User Profile List**.

Manage Lookup Tables

STEP 1. From the **Administration Home** page select the **Lookup Tables** link in the left navigation menu.
STEP 2. View **Lookup Table List.** See **Appendix C: Lookup Tables** for more information.

STEP 3. Select a Lookup Table to edit.

STEP 3.1 Select a park in the associated list box.
STEP 3.2 Select **Go** to edit the lookup table for that Park.
STEP 3.3 **--OR--** For Super Users Only
STEP 3.4 Click on the **Edit** link associated with the Lookup table to be updated. This will allow you to edit the Service-Wide lookup table. (Users without appropriate permissions will not see this link)

STEP 4. The Manage <***Lookup Table Name***> form appears.
STEP 5. For each field that may be updated in a Lookup Table there is an associated data entry field. Enter the new code, value or name of item as appropriate. Remember that fields with an * in their field label must be filled (i.e. required).
STEP 6. Click **Add <Lookup item>**. The item gets added to the <**Lookup item**> **List.** For each item in the list, there is an **Active** check box. When an item is first added it is automatically checked. An item is not active when its Active check box is empty. Inactive items will not be available from dropdown lists.
STEP 7. Click **Save** to create/update a record in the database.
--OR--
Click **Cancel** to exit without saving and return to the **Lookup Table List.**

Manage Links – Superuser Only

STEP 1. From the **Administration Home** select the **Manage Public Links** in the left navigation for links available to General Public. These links will appear on the PEPC Public site under **Links** in the main menu.
-- OR--
Select the **Manage Private Links** link for links available to NPS Employees and contractors. These links will appear on the PEPC Private site (accessed through a user login) under **Tools** in the main menu.
STEP 2. Complete the **Manage Public/Private Links** form using the fields described below:

Filter	Notes
Category*	Select the category under which link will appear (required). Link categories can be added by Superusers through **Manage Lookup Tables** procedures described in this section.
Name*	Title of link to be displayed to users (required).
URL*	Web address of target web site to which added link points (required).

STEP 3. Click **Add Link**. The link appears in the List of Links for Private/Public <Category Name> table.

STEP 3.1 By default links appear in the order in which they are added to the system. To customize the order in which links appear within the associated category you may enter numbers in the **Order** column. Once added, a **Delete** check box is available. If a link is no longer valid, click the **Delete** check box. If link is valid, leave the **Delete** check box unselected (i.e. empty) and the selection will continue to appear.

STEP 4. Click **Save** to create a record in the database. The links will appear in their respective sections. Links checked in the Delete column will be deleted upon saving.
-- OR--
Click **Cancel** to exit without saving and return to **Manage Public/Private Links** form.

Generate Administration Reports – Superuser Only

STEP 1. From the **Administration Home** page select the **Administration Reports** link in the left navigation menu.
STEP 2. View **Administration Reports.**

STEP 2.1 Select report of interest in the **Report Name** table.
STEP 2.2 Report results display.

Site Maintenance

The Site Maintenance area is where Region and Park Administrators can maintain the data for their region or park. This will include several utilities to aid them in the maintenance.

• The first tool is the ability to 'Delete Project'. Sometimes a project is duplicated in PEPC and one needs to be deleted. Administrators can enter the project id (twice for verification) and delete the project.

• The second tool is the ability to 'Delete Project'. Sometimes a project is duplicated in PEPC and one needs to be deleted. Administrators can enter the project id (twice for verification) and delete the project.

The second tool is 'Remove Duplicate Users'. This provides a method for Regional and Park Administrators to remove duplicate names from the address book. This will not remove system users from PEPC. Sometimes people were added to the address book more than once, but only one of the entries was actually made a system user.

STEP 1. Click on the Site Maintenance link in the left navigation menu.

STEP 2. You can search for a name by entering all or a portion of the last name, and or first name. If a name is found only in the address book, but not set up as a system user, you can select the '**delete account'** check box. If the name was not assigned any responsibilities that entry will be removed once the '**Save**' button is selected. However, if the name was assigned responsibilities, the administrator can **re-link the responsibilities** to the true system user. The page will display the name and person id, and then you must click on the binoculars to search for the person to which to reassign the responsibilities.

NOTE: You must open the address book, and do a SEARCH to pull up all the users with that name. The address book defaults to the person you have selected!

STEP 2.1 Once the person to re-link to is selected and listed in the text box, click the '**Re-Assign User'** button bar. You can also click on the '**View Responsibilities**' link to see what the responsibilities are before you re-assign them. A page will display showing the names deleted from the address book, as well as the reassignment.

Other Important Information

Authentication and Access Control

You are required to enter a valid username and password in order to access the PEPC application. Once in the PEPC application, access to specific areas of functionality will be available based on your user role. Go to **Appendix D: Roles & Permissions** for further information regarding user roles.

Cookies

The PEPC application uses temporary cookies to maintain information about your session. This information is only stored during your current browsing session, and is deleted when you close your browser.

You must have cookies enabled in your browser in order to access functionality in PEPC. To determine if cookies are enabled in your browser or to enable cookies in your browser, consult your browser documentation.

Javascript

The PEPC application uses Javascript to display confirmation messages and pop-up windows. In order for this to function properly in the PEPC application, you must have Javascripting or Active scripting enabled.

To determine if JavaScript or active script is enabled in your browser or to enable JavaScript or active script in your browser, follow the instructions below for your browser.

Microsoft Internet Explorer 6 or later:

STEP 1. On the Tools menu, select Internet Options.
STEP 2. On the Security tab, select Internet.
STEP 3. Click Default Level, and then click Apply.
STEP 4. Click OK.

Mozilla Firefox 3.x or later:

STEP 1. On the **Edit** menu, select **Preferences**.
STEP 2. In the **Category** pane, click **Advanced**.
STEP 3. Select the **Enable Javascript** check box, and then click **OK**.

Session Time Outs

For security purposes the PEPC application will time out after 60 continuous minutes of inactivity. At this time you will have to login again to continue using the PEPC application.

After 55 minutes of inactivity, the PEPC application will display a message that tells you that your session is about to expire and asks if you want to refresh your session. You may click **OK** or **Cancel**. You will have 5 minutes to respond to the message.

STEP 1. If you click **OK** within 5 minutes of the message appearing, your session will be refreshed and you will not be logged out of the PEPC application**.**
STEP 2. If you click **Cancel** the message box will close and the timer will continue. You will be logged out of the PEPC application after a total of 60 minutes of inactivity.

Project Planning & Public Communication

Introduction

Good project planning with PEPC is organized into an eight-step process. Each step in PEPC is clearly described to ensure efficiency consistent with the guidelines presented in Director's Order #12. You may start at the beginning and work one step after another, or you may fill out just the portions of a step that apply to your planning initiative or area of responsibility.

The eight steps are represented in the left navigation. These steps are visible from a project's Home page and from each of the steps within the process. They are as follows:

1. Project Setup
2. Funding
3. Internal Scoping
4. Natural/Cultural Compliance
5. Internal Documents
6. Public Communication
7. Public Documents & Comment Analysis
8. Close Project

1. Step 1: Project Setup

PEPC facilitates good project planning through implementing the procedural requirements of the National Environmental Policy Act (NEPA).

1.1 Create a Project

STEP 1. From your **Home** page or **Park Home** page, click on the **Create Project** link.

TIP: The **Create Project** link is at the top right area of the page on your **Home** page and in the left navigation on the **Park Home** page.

TIP: If you select Create Project from the Park Home page, the Lead Park field will be automatically populated.

1.2 View/Edit Basic Information

STEP 1. Choose the Lead Park for the new project that you are creating.

Field Label	Notes
Lead Park*	1. Use the arrow to select a lead Park from the dropdown list (required). You can type the first letter of the Park Name to automatically go to that alphabetical area in the list. 2. Click **Add Park.**

TIP: If this is a project that does not have a lead park (SRS, NHA, etc.), need to contact a PEPC Administrator to have a new listing and acronym created before a project can be created.

STEP 2. Identify other parks that are impacted by this project.

Field Label	Notes
Other Park	1. Select a Park from the dropdown list. You can type the first letter of the Park Name to automatically go to that alphabetical area in the list. 2. Click **Add Park** The Park will be added to the **Other Parks** table. Continue adding parks until all parks that the project affects are listed in the **Other Parks** table. To delete a park that has been added to the table, select the check box for that park in the Delete column. Parks that are checked when the form is saved will be deleted from the list.

STEP 3. Continue adding basic project information using the fields described below:

Field Label	Notes
Project ID	A project ID is generated automatically by the PEPC application. The default value fot this field is “New”.
Old Project ID	Enter any previous reference IDs for this project. This field is simply for tracking purposes and is not required.
Project Status	Select a status for this project from the dropdown list. The status will change as the project progresses through planning and implementation.
Target Compliance Completion	Using the mm/dd/yyyy format, enter the estimated date for compliance completion.
Compliance Status	Select a compliance status from the dropdown list. The status will change as the compliance is completed. Compliance on a project can be 'Proposed', 'In Process', 'Closed Complete' or 'Closed Incomplete'. The following NEPA actions will change the 'Compliance Status' field in PEPC to 'Closed Complete': 'CE Signed' date FONSI 'Signed by RD' date ROD 'Approval' date Memo to File 'Added to File' date
Actual Compliance Completion	This is system-generated. Initially it displays blank, but will be set to the system date when the project is saved.
Funding Status	The Funding Status defaults to 'Unfunded'. Update the funding status as needed.
Funded Date	Using the mm/dd/yyyy format, enter the date the project is funded.
Project Creation Date	This is system-generated. Initially it displays as unknown, but will be set to the system date when the project is saved.
Project Target Start*	Using the mm/dd/yyyy format, enter the estimated date for project initiation (required). Note: Depending on the type of project or plan, this could be when the project is funded and work begins; when the superintendent approves project initiation; or, for plans, when the internal scoping begins.
Project Close	Using the mm/dd/yyyy format, enter the date the project is closed.
Funding Sources	Click on **Choose from Picklist** 1. New window opens, select funding source from Available Choices window 2. Click on **Add Selected**. Items appear in lower window. Click on **Save Changes** when all sources are completed.
Sensitive	Click in the check box if this project will be raised to regional director or secretary.
Title*	Enter the name of the project (required). This title will appear on list pages in PEPC and on the public site once information is published for this project.
Secondary Title	Enter a longer version of the name for the project. The secondary title will not appear on any public pages.
Description*	Enter a description of the project (required). Develop a brief narrative that outlines the scope of the project, including sufficient detail so that reviewers can understand the area of impact. Include any subsequent or follow-up actions that will be needed in conjunction with the project. Data entry is limited to 4000 characters.
Send an email for Project Descriptions change	You can check this box when making significant Project Description changes. An email will be sent to the Project Leader, NEPA & NHPA Specialists.
Project Leader*	Select the name of the project leader using the **Person Search** feature (required). To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.**

	4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
NEPA Specialist*	Check the box for the NEPA specialist responsible for this project (required). An Administrator may add additional names to the NEPA Specialist list using the Lookup Tables. See PEPC Guide: Appendix C: Lookup Tables for more information.
NEPA Specialist*	Select the NEPA specialist responsible for this project from the dropdown list (required). An Administrator may add additional names to the NEPA Specialist list using the Lookup Tables. See PEPC Guide **Appendix C: Lookup Tables** for more information on this.
NHPA Specialist*	Select the NHPA specialist responsible for this project from the dropdown list (required). An Administrator may add additional names to the NHPA Specialist list using the Lookup Tables. See **Appendix C: Lookup Tables** for more information on this.
External Agency	Enter the name of any external agency involved in the project, if there is one.
Division/Office	Select the division or office that is sponsoring the project from the dropdown list.
Designer	Select the name of the individual assigned to verifying environmentally sound design using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Conceptual Design	Using the mm/dd/yyyy format, enter the date for which you anticipate the conceptual design for this project to be complete.

STEP 3.1 **Research Permit and Reporting System (RPRS) ApplicationID#** - If this project is also in the RPRS system, enter that identifier here.

STEP 4. Select a Project Type* (required) from the dropdown list. If you select Other, a description is required. Enter the description in the text entry box provided.
STEP 5. If appropriate, select a Project Categories from the list box. If you select Other, a description is required. Enter the description in the text entry box provided. More than one project category may be selected.

NOTE: Click on **Choose from Picklist**

1. New window opens, and lists several categories in the Available Choices window and more than one project category may be selected. Select an item by left clicking.

- Select additional items by holding down the Ctrl button and clicking.
- Deselect an item by holding down the Ctrl button and clicking.
- Click on Add Selected. Items appear in lower window.
- Click on Save Changes when all selections are completed.

General Notes: The general notes section is for your use as needed. For instance if there are special circumstances or details on the project you want to record, this is the location to do so.

STEP 6. Add a Location pertinent to this project using the fields described below:

NOTE: Enter as much information as possible to identify the project location. At least one location with both a county and a state is required.

Field Label	Notes
County/Borough*	Enter the County affected by this project (required). If neither applies, please enter N/A
State*	Click on the arrow and select a State from the dropdown list (required). Enter the first letter of the State to jump to that alphabetical area of the list.
District	Enter District information.
Section	Enter the Section.
Geographic Marker	Enter a Geographic Marker identifying the site if there is one. Include survey markers, mileposts, subsections, or GIS points.
Marker Type	Click on the arrow and select a type of geographic marker from the dropdown list.
Other	Enter any other information not covered in the fields above to locate the site of the project. Data entry is limited to 100 characters.

STEP 6.1 Click **Add Location**. The location added will display in the **Locations** table. Continue adding locations until all locations affected by this project are listed in the **Locations** table. To delete a Location that has been added to the table, select the check box for that Location in the Delete column. Locations that are checked when the form is saved will be deleted from the list.

STEP 6.2 Add the Administrative Record Location and Contact.

Field Label	Notes
Use the Default from the Park Lookup table	If an entry has been made in the Park Lookup table for the administrative record contact and location, you can leave the default selection.
Admin. Record Location	If there is no default, or for this project you need to enter a record other than the default, use the 'Add Administrative Record Information manually' entry section. Enter the location of the administrative record.
Admin. Record Contact	Enter the name of the Admin. Record Contact using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click Search. 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the Search Results table, continue by entering identifying information under the heading Add Person. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name* (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click Select. The person's name appears on the form in the name field.

STEP 7. Add **Contract/Consultant Information** using the fields described below:

Field Label	Notes
Contractor /Consultant Name	Enter the name of the contractor. Data entry is limited to 100 characters.
Contract/Consultant Number	Enter the contract number. Data entry is limited to 50 characters.

STEP 7.1 Click Add Contract/Consultant information. The contract/consultant information will display in the Contract/Consultant Information table. Continue adding contractor/consultant names and contract numbers until all contracts for this project are listed in the Contract/Consultant Information table. To delete Contract/Consultant Information that has been added to the table, select the check box for that Contract/Consultant Information in the Delete column. Contract/Consultant Information that is checked when the form is saved will be deleted from the list.

STEP 8. Link or Upload a file which further describes the project (such as photos, maps, etc.)

Field Label	Notes
Title	Enter a Title
Link Location	Enter the location of a Project Schedule file. This may be a file that already resides on a server and you simply wish to access from its current location rather that upload it to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded **-- OR --**

	Click on **Browse**... and locate the file to be uploaded Click **Open**. The path and filename will appear in the File Upload field. See PEPC Guide: Uploading Files and Images for more information.

STEP 9. Click Add Link/File to add it to the system (If Step 8 was completed).
Click Save to save all additions/changes to the database. There is now a new project associated with the lead park and other parks selected in Steps 1 and 2.
-- OR --
Click Cancel or Clear! to exit without saving and return to the Basic Information view page.
STEP 10. Continue with Adding Milestones as follows.

1.3 View/Edit Milestones

STEP 1. Click on the Project Setup link in the left navigation on the Project Home page.
STEP 2. Click on the Edit link under the Milestones bullet in the left navigation.
STEP 3. The following choices appear:

Milestones Construction
Milestones Design
Milestones GMP/Special Resource Study
Milestones NON GMP Planning

Select the Status and complete the dates as milestones occur. You will need to revisit the milestones to keep the information current. Each Milestone page has an area where you can upload or link a file such as a project schedule.

STEP 3.1 **Construction** Milestones -Enter the Construction dates using the fields described below:

Field Label	Notes
Construction Status *	Using the mm/dd/yyyy format, enter the estimated date for approval of the project agreement.
Contract Advertisement	The date that Contract was first advertised.
Contract Award	Using the mm/dd/yyyy format, enter the date the contract was awarded.
Pre-Construction Conference	Using the mm/dd/yyyy format, enter the date of the pre-construction conference.
Construction Start	Using the mm/dd/yyyy format, enter the date that construction began
Construction End	Using the mm/dd/yyyy format, enter the date that construction was completed.
Day Labor/Park Personnel Start	Using the mm/dd/yyyy format, enter the actual date day labor began.
Day Labor/Park Personnel End	Using the mm/dd/yyyy format, enter the actual date day labor ended.

Project Schedule Link/Upload - Schedule file may be linked or uploaded on this page.
See Step 3.5

STEP 3.2 **Design** Milestones -Enter the Design dates using the fields described below:

Field Label	Notes
Design Status *	Select the current status of the Design.
Target Project Agreement	Using the mm/dd/yyyy format, enter the date for approval of the project agreement.
Actual Project Agreement	Using the mm/dd/yyyy format, enter the actual date that all project agreements are approved (all signatures obtained).
30% Design Review	Using the mm/dd/yyyy format, enter the date the 30% Design occurred.
70% Design Review	Using the mm/dd/yyyy format, enter the date the 70% Design occurred.
DAB Review	Using the mm/dd/yyyy format, enter the date the DAB Review occurred.
95% Design Review	Using the mm/dd/yyyy format, enter the date the 95% Design occurred.

Final Approval	Using the mm/dd/yyyy format, enter the actual date of final design approval.
Contractor/Consultant Name	Enter the name of the Contractor
Contract/Consultant Number	If the name is filled in, this also needed to be filled out.
A&E Contract Award	Using the mm/dd/yyyy format, enter the date the contract was awarded.
A&E Contract Award Completion	Using the mm/dd/yyyy format, enter the date the contract award was completed.

Project Schedule LInk/Upload - Schedule file may be linked or uploaded on this page.
See Step 3.5

STEP 3.3 **GMP/Special Resource Study Milestones** - Enter the GMP Planning dates using the fields described below:

Field Label	Notes
GMP/Special Resource Study Status *	Select the current status of the GMP or SRS.
Target Project Agreement	Using the mm/dd/yyyy format, enter the estimated date of the project agreement.
Actual Project Agreement	Using the mm/dd/yyyy format, enter the actual date of the project agreement.
Target SRS Statement of Significance	Using the mm/dd/yyyy format, enter the estimated date of the SRS Statement.
Actual SRS Statement of Significance	Using the mm/dd/yyyy format, enter the actual date of the SRS Statement.
Target Alternatives	Using the mm/dd/yyyy format, enter the estimated date of the alternatives.
Actual Alternatives	Using the mm/dd/yyyy format, enter the actual date of the alternatives.
Target Internal Review GMP/DEIS	Using the mm/dd/yyyy format, enter the estimated date of the Internal Review.
Actual Internal Review GMP/DEIS	Using the mm/dd/yyyy format, enter the actual date of the Internal Review.
Target GMP/DEIS Public Review	Using the mm/dd/yyyy format, enter the estimated date of the Public Review.
Actual GMP/DEIS Public Review	Using the mm/dd/yyyy format, enter the actual date of the Public Review.
Target GMP/FEIS	Using the mm/dd/yyyy format, enter the estimated date of the Final EIS.
Actual GMP/FEIS	Using the mm/dd/yyyy format, enter the actual date of the Final EIS.
Target ROD	Using the mm/dd/yyyy format, enter the estimated date of the Record of Decision.
Actual ROD	Using the mm/dd/yyyy format, enter the actual date of the Record of Decision.
GMP Contract Award	Using the mm/dd/yyyy format, enter the date the contract for the GMP was awarded.
GMP Contract Completion	Using the mm/dd/yyyy format, enter the completion date for the GMP contract.

Project Schedule Link/Upload - Schedule file may be linked or uploaded on this page.
See Step 3.5

STEP 3.4 **Non-GMP Planning** Milestones - Enter the Non-GMP Planning dates using the fields described below:

Field Label	Notes
Non-GMP Planning Status *	Select the current Planning status.
Target Plan Start	Using the mm/dd/yyyy format, enter the estimated date of the planning start.
Actual Plan Start	Using the mm/dd/yyyy format, enter the actual date the planning started.
Actual Plan End	Using the mm/dd/yyyy format, enter the actual date planning was completed.

Plan Contract Award	Using the mm/dd/yyyy format, enter the date the contract for the plan was awarded.
Plan Contract Completion	Using the mm/dd/yyyy format, enter the date the contracted plan was completed.
Target Compliance Completion	Using the mm/dd/yyyy format, enter the estimated date for compliance completion.
Actual Compliance Completion	Using the mm/dd/yyyy format, enter the actual date for compliance completion.
Compliance Contract Award	Using the mm/dd/yyyy format, enter the actual date the compliance contract was awarded.
Compliance Contract Completion	Using the mm/dd/yyyy format, enter the actual date that the contract was completed.

STEP 3.5 Add a **Project Schedule** to a specific Milestone page using the fields described below:

Field Label	Notes
Link Location	Enter the location of a Project Schedule file. This may be a file that already resides on a server and you simply wish to access from its current location rather that upload it to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded **-- OR --** Click on **Browse**... and locate the file to be uploaded Click **Open**. The path and filename will appear in the File Upload field. See PEPC Guide: Uploading Files and Images for more information.

1.4 View/Edit Justification

STEP 1. Click on **Project Setup** in the left navigation on the **Project Home** page.
STEP 2. Click on **Edit** under the **Justification** bullet in the left navigation.
STEP 3. Click all check boxes that apply as justification for this project.
STEP 4. Provide further justification information using the fields described below:

Field Label	Notes
Public Safety, Energy Conservation, Employee Health/Safety, Sustainable Design, Partnership/Community Development, Legal Mandate/Policy, Citations/Violations/Court Orders, Resources At Risk, Other	Select check boxes that apply for this project
Park GPRA Goal	From the list box, choose the GPRA goal(s) that applies to the park. The list box works like this: Select an item by left clicking. Select additional items by holding down the Ctrl button and clicking. Deselect an item by holding down the Ctrl button and clicking.
Brief Justification	A statement indicating why you are completing the project. This can be the same as the PMIS justification. Data entry is limited to 4000 characters.
Measurable Result	Enter the measurable result for project justification. Data entry is limited to 4000 characters.

STEP 5. Click **Save** to save additions/changes to the database. View this information on the **Justification** view page.
--OR-- Click **Cancel** to exit without saving and return to the **Justification** view page**.**
STEP 6. Continue with **View/Edit Project Development Questionnaire** if appropriate.

1.5 View/Edit Project Development Questions

This is where the impacts to park resources that this project will entail are discussed in greater detail. When you fill out

the questionnaire, you need to be as specific as possible, with details on all aspects of the project. Be sure to quantify the area of impact as accurately as possible.

STEP 1. Click on the **Project Setup** link in the left navigation on the **Project Home** page.
STEP 2. Click on the **Edit** link under the **Internal Scoping Questionnaire** bullet in the left navigation.
STEP 3. Answer all questions from the four categories (**Asset Questions, Cultural/Historic Resource Questions, Natural/Water Resource Questions, Land/Visitor Use Questions**) that apply to this project. Data entry is limited to 2000 characters each. If your park has added additional questions in the PDQ Addendum Lookup table you should answer these as well.
STEP 4. Click **Save** to save additions/changes to the database and return to the **Internal Scoping Questionnaire** view page.
-- OR --
Click **Cancel** to exit without saving and return to the **Internal Scoping Questionnaire** view page**.**
STEP 5. Continue with **Add/Edit Cooperating Agencies** if appropriate.

1.6 View/Edit Cooperating Agencies

If you have any questions regarding cooperating agencies, please reference DO-12, Section 2.13 Cooperating Agencies.

STEP 1. Click on the **Project Setup** link in the left navigation on the **Project Home** page.
STEP 2. Click on the **Edit** link under the **Cooperating Agencies** link in the left navigation.
STEP 3. Click the radio button for **yes** or **no** in answer to: **Are you a cooperating Agency?**
STEP 4. Add dates for the fields described below:

Field Label	Notes
Requested Date	Using the mm/dd/yyyy format, enter the date that you were requested to be a cooperating agency.
Responded Date	Using the mm/dd/yyyy format, enter the date that you responded to the request.

STEP 5. Click on the check box for **Other Cooperating Agencies Required** if appropriate.
STEP 6. Add a Cooperating Agency, if necessary, using the fields described below:

Field Label	Notes
Agency Name	Enter the name of the cooperating agency.
Request Date	Using the mm/dd/yyyy format, enter the date that the cooperating agency will begin operating cooperatively.
Sunset Date	Using the mm/dd/yyyy format, enter the date that the cooperating agency will stop operating cooperatively.
Status	Click on the arrow and select a status from the dropdown list.
Notes	Add any information that is pertinent to the agency and the project. Data entry is limited to 2000 characters.

STEP 7. Add an Agreement Document, if necessary, using the fields described below:

NOTE: An **Agreement Document** may only be added when a Cooperating Agency is added. Once added, an **Agreement Document** may not be edited or deleted without deleting the Cooperating Agency.

Field Label	Notes
Link Location	Enter the location of the Agreement Document for the Cooperating Agency. This may be a file that already resides on a server and you simply wish to access it from its current location rather than upload it to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded **-- OR --** Click on **Browse…** and locate the file to be uploaded Click on **Open**. The path and filename will appear in the File Upload field. See **PEPC Guide: Uploading Files and Images**

STEP 8. Click **Add Cooperating Agency** The Agency will appear in the **Cooperating Agencies** table. To delete a Cooperating Agency that has been added to the table, select the check box for that Cooperating Agency in the Delete column. Cooperating Agencies that are checked when the form is saved will be deleted from the list.

NOTE: Cooperating Agency information can be edited by selecting the corresponding **Edit** link in the **Cooperating Agencies** table. After selecting the **Edit** link, the fields described in Step 6 (above) can be updated. Files associated with Cooperating Agencies cannot be edited. Click the **Update Cooperating Agency** button to save the updated information.

STEP 9. Click **Save** to save additions/changes to the database. View this information on the Cooperating Agencies view page.
--OR--
Click **Cancel** to exit without saving and return to the **Cooperating Agencies** view page.

1.7 View/Edit Joint Lead Agencies

STEP 1. Click on the Project Setup link in the left navigation on the Project Home page.
STEP 2. Click on the Edit link under the Joint Lead Agencies link in the left navigation.
STEP 3. Click the radio button for yes or no in answer to: Are you a Joint Lead Agency?
STEP 4. Add dates for the fields described below:

Field Label	Notes
Requested Date	Using the mm/dd/yyyy format, enter the date that you were requested to be a joint lead agency.
Responded Date	Using the mm/dd/yyyy format, enter the date that you responded to the request.

STEP 5. Click on the check box for **Other Lead Agencies Required** if appropriate.
STEP 6. Add a Joint Lead Agency, if necessary, using the fields described below:

Field Label	Notes
Agency Name	Enter the name of the joint lead agency.
Request Date	Using the mm/dd/yyyy format, enter the date that the joint lead agency will begin operating cooperatively.
Sunset Date	Using the mm/dd/yyyy format, enter the date that the joint lead agency will stop operating cooperatively.
Status	Click on the arrow and select a status from the dropdown list.
Notes	Add any information that is pertinent to the agency and the project. Data entry is limited to 2000 characters.

STEP 7. Add an Agreement Document, if necessary, using the fields described below:

NOTE: An **Agreement Document** may only be added when a Joint Lead Agency is added. Once added, an **Agreement Document** may not be edited or deleted without deleting the **Joint Lead Agency**.

Field Label	Notes
Link Location	Enter the location of the Agreement Document for the Joint Lead Agency. This may be a file that already resides on a server and you simply wish to access it from its current location rather than upload it to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded **-- OR --** Click on **Browse…** and locate the file to be uploaded Click on **Open**. The path and filename will appear in the File Upload field. See **PEPC Guide: Uploading Files and Images**

STEP 8. Click Add Joint Lead Agency. The Agency will appear in the Joint Lead Agencies table.To delete a Joint Lead Agency that has been added to the table, select the check box for that Joint Lead Agency in the Delete column. Joint Lead Agencies that are checked when the form is saved will be deleted from the list.

NOTE: Joint Lead Agency information can be edited by selecting the corresponding Edit link in the Joint Lead Agencies table. After selecting the Edit link, the fields described in Step 6 (above) can be updated. Files associated with Joint Lead Agencies cannot be edited. Click the Update Joint Lead Agency button to save the updated information.

STEP 9. Click Save to save additions/changes to the database and return to the Joint Lead Agencies view page.
-- OR --
Click Cancel to exit without saving and return to the **Joint Lead** Agencies view page.

1.8 Print Forms

(Basic Information form, Justification form, Project Development Questionnaire form)

STEP 1. From a Project, click on the Project Setup link in the left navigation.
STEP 2. To print a form, click on the Print Forms link in the left navigation.
STEP 3. Click on the Basic Information form, Justification form, or Project Development Questions form.

STEP 3.1 To open a form, click Open.
STEP 3.2 To save the form, click Save.
STEP 3.3 To cancel and return to the Print Forms page, click Cancel.

2 Step 2: Funding

2.1 View/Edit Funding Information

STEP 1. From a Project, click on the Funding link in the left navigation.
STEP 2. Click on the **Edit** link under the **Funding** bullet or in the upper right corner.
STEP 3. Enter funding information for this project using the following fields:

Field Label	Notes
PMIS ID(s)	Enter the ID(s) for this project as it exists in the Project Management Information System (PMIS). To enter multiple PMIS IDs for this project, separate each ID with a comma. The ID will become a link that displays live data from the PMIS system when in the View Mode.
FMSS Work Order Number(s)	Enter the Facility Management Systems Software (FMSS) Work Order Number(s). To enter multiple FMSS IDs for this project, separate each ID with comma. Once saved, you can click on this number from the view page to pull information from the FMSS system. Note: Data is updated nightly from the FMSS system.
FMSS Asset Number(s)	Enter the Facility Management Systems Software (FMSS) Asset Number(s). To enter multiple FMSS Asset Numbers for this project, separate each ID with a comma.
Funding Status*	Enter the status of Funding (required).
Funded Date	Using the mm/dd/yyyy format, enter the date that funding for this project is anticipated.
Funding Source(s)	Click on one or more funding source(s) in the list box. Select all that apply. The list box works like this: • Select an item by left clicking. • Select additional items by holding down the Ctrl button and clicking. • Deselect an item by holding down the Ctrl button and clicking.
Funding Account Number(s)	Enter the Account Number(s) which will be used to fund the project, separated by commas.

STEP 4. Click in check boxes for all labor types that apply to this project: Day Labor, Contract Labor, and/or Engineering or Technical Services
STEP 5. Use the following fields to estimate costs for this project:

NOTE: If the project is a facilities project, then the cost estimate should be derived from FMSS. If it is a non-facilities project, then cost should be developed for labor/contract, supplies, materials,

compliance/archeology, and anything else associated with that project and its implementation. See PEPC Guide: **Appendix B: Estimating Costs** for more information.

Fill in the fields for Requested Estimates and Actual Costs as Needed:

Field Label	Notes
Implementation (Day Labor)	Enter the cost of the implementation using Park staff. Numbers entered will be converted to U.S. currency format and rounded to two decimal places.
Implementation (Contract)	Enter the cost of the implementation using a contract vendor. Numbers entered will be converted to U.S. currency format and rounded to two decimal places.
Design	Enter the cost for project design. Numbers entered will be converted to U.S. currency format and rounded to two decimal places.
Compliance & Planning	Enter the cost for compliance and planning. Numbers entered will be converted to U.S. currency format and rounded to two decimal places.
Other	Enter any other costs that are not included in the previous categories. Numbers entered will be converted to U.S. currency format and rounded to two decimal places.
Total	The total cost will be calculated. Numbers will be converted to U.S. currency format and rounded to two decimal places.

STEP 5.1 Add a link or upload a cost estimate spreadsheet:

Field Label	Notes
Link Location	Enter the location of any file that relates to the Cost Estimate. These may be files that already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded -- OR – Click on **Browse…** and locate the file to be uploaded Click on **Open.** The path and filename will appear in the File Upload field.

STEP 6. Click Save to save additions/changes to the database. View this information on the Funding view page.
--OR--
Click Cancel to exit without saving and return to the Funding view page.

3. Step 3: Internal Scoping/IDT Tasks

3.1 View/Edit Interdisciplinary Team Members

STEP 1. From a Project, click on the **Internal Scoping** link in the left navigation.
STEP 2. Click on the **Edit** link under the **IDT Members** bullet.
STEP 3. Members previously added to the team appear in the top listing. If your PEPC Park Administrator has created a standard list of IDT members in the IDT Member Lookup table, you can add members to your team by selecting them from the **Park Specific IDT List**, by checking the **'Assign to IDT'** box. Or you can add members to your team by adding their responsibility and names individually.

To add team members and assign responsibilities individually:

Field Label	Notes
Responsibility*	Select the responsibility from the drop down list that this team member will fulfill on this project (required).
Team Member*	Select the name of the person that will fill the responsibility assigned above using the **Person Search** feature. (required) To add a name by using the Person Search feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use.

	a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name* (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select**. The person's name appears on the form in the name field.

STEP 4. Click **Add Additional Member**. The name and associated responsibility will appear in the **Interdisciplinary Team Members** table.

STEP 4.1 If you would like to remove the individual assigned a role, click on the Delete check box to remove the name and associated responsibility from the list.

NOTE: You can't delete a Project Leader, NHPA Specialist, or NEPA Specialist assigned on the Basic Information page under Project Setup. See PEPC Guide: Project Planning and Public Communication: Step 1.

STEP 5. Click Save to save additions/changes to the database. View this information on the IDT Members view page.
--OR-- Click Cancel to exit without saving and return to the IDT Members view page.

3.2 Schedule, Track and Cancel Site Visits

STEP 1. From a Project, click on the **Internal Scoping/IDT Tasks** link in the left navigation.
STEP 2. Click on the **Site Visits** link in the left navigation.

STEP 2.1 View Site Visits in the **Site Visits** table and cancelled site visits in the **Cancelled Site Visits** table.

STEP 3. To create a new site visit, click on the **Add Visit** link at the top right area of the screen on the **Site Visits** page. To edit a site visit, click **Edit** in the corresponding row of the **Site Visits** or **Cancelled Site Visits** table. To delete a site visit, click **Delete** in the corresponding row of the **Site Visits** or **Cancelled Site Visits** table.
STEP 4. Log Site Visit Information using the fields described below:

Field Label	Notes
Visit Date*	Using the mm/dd/yyyy format, enter the date of the site visit (required).
Cancel Site Visit	Select this check box to cancel the site visit. Cancelled site visits will appear in the **Cancelled Site Visits** table. To uncancel a site visit, deselect the Cancel Site Visit check box.
Location*	Enter information regarding the location of the site visit. Include enough detail to identify the location (required).
Site Visit Description	Enter any additional information or notes regarding the site visit. If additional people that are not part of the IDT were present, you can list them here. For instance, it is important to note any comments/concerns with the project. If you have any other feasible alternatives to be considered, or if you need more information, note it and include the person who will be responsible for providing that information. For instance, if the concessions specialist wants to re-roof a building using eco-shakes, and the cultural resource specialist doesn't know what eco-shakes look like, it should be noted that the concessions specialist must supply more information to the cultural resource specialist about eco-shakes. You can also enter notes to your team in this field prior to the site visit and these notes will be placed in the email to the team. You can later replace this with notes from the site visit.

STEP 4.1. To send an email to the IDT to notify them of the scheduled the visit, click the button "**Send Email Notification & Save**"

STEP 5. The **IDT Members Present** table is automatically filled based on the team identified in **Section**

3.3.1: View/Edit Interdisciplinary Team Members above.

STEP 5.1 Select the check box in each row corresponding to the team members present at the site visit. You can list additional people that are not part of the IDT in the **Notes** field.
STEP 5.2 In the Others Present/Notes section you can type notes in the "Others Present:" text box.

STEP 6. Add a Link or Upload a File using the following fields:

Field Label	Notes
Link Location	Enter the location of any file that relates to the Cost Estimate. These may be files that already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded -- OR – Click on **Browse…** and locate the file to be uploaded Click on **Open.** The path and filename will appear in the File Upload field.

STEP 7. Click Add Link/File.
STEP 8. Click Save to save additions/changes to the database. View this information on the Site Visits view page.
– OR–
Click Cancel to exit without saving and return to the Site Visits view page.

3.3 Schedule, Track, and Cancel Internal Meetings

STEP 1. From a Project, click on the **Internal Scoping** link in the left navigation.
STEP 2. Click on the **Internal Meetings** link in the left navigation.

STEP 2.1 View internal meetings in the **Internal Meetings** table and cancelled internal meetings in the **Cancelled Internal Meetings** table.

STEP 3. To create a new internal meeting, click on the **Add Meeting** link at the top right area of the screen on the **Internal Meetings** page. To edit an internal meeting, click **Edit** in the corresponding row of the **Internal Meetings** table. To delete an internal meeting, click **Delete** in the corresponding row of the **Internal Meetings** table.
STEP 4. Create or Edit an Internal Meeting using the fields described below:

Field Label	Notes
Meeting Date* and Time*	Using the mm/dd/yyyy format, enter the date of the meeting (required).
Cancel Internal Meeting	Select this check box to cancel the internal meeting. Cancelled internal meetings will appear in the **Cancelled Internal Meetings** table. Cancelled internal meetings can be un-cancelled.
Meeting Time*	Select the starting time in hours, minutes and AM or PM from the list boxes (required).
Location*	Enter the name of the facility or location for the meeting (required).
Meeting Description	Enter any additional information or notes regarding the internal meeting. If additional people that are not part of the IDT were present, you can list them here.

Click Send Email Notification & Save - When you are ready to notify your team of the internal meeting, click this button bar and an email will be sent to all IDT members.

STEP 5. The **IDT Members Present** table is automatically filled based on the team identified in **Section 3.3.1: View/Edit Interdisciplinary Team Members** above.

STEP 5.1 Select the check box in each row corresponding to the team members present at the internal meeting. You can list additional people that are not part of the IDT in the **Notes** field.

STEP 6. Add a Link or Upload a File using the following fields:

Field Label	Notes

Title	Enter the name or title of the article, file or image relating to the internal meeting.
Link Location	Enter the location of any file that relates to the internal meeting. These files may already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded. –OR – Click on **Browse…** and locate the file to be uploaded. Click on **Open.** The path and filename will appear in the File Upload field.

STEP 7. Click Add Link/File
STEP 8. Click Save to save additions/changes to the database. View this information on the Internal Meetings view page.
– OR–
Click Cancel to exit without saving and return to the Internal Meetings view page.

3.4 Assign Tasks

STEP 1. From a Project, click on the **Internal Scoping/IDT Tasks** link in the left navigation.
STEP 2. Click on the **Tasks** link in the left navigation.
STEP 3. By default the **Task List** contains a list of all tasks for the project. To assist in finding the task in which you are interested, the list can be narrowed using Filters.
STEP 4. The following filters are available:

Field Label	Notes
Responsibility	Display only those tasks associated with the selected Responsibility.
Complete	Display only those tasks that are either complete or not complete.
Task Due From/To	Using the mm/dd/yyyy format, enter the expected completion date for the tasks (required).

STEP 5. Click on **Search.** The **Task List** is filtered according to the criteria selected.
STEP 6. To create a new task, click on the **Create Task** link at the top right area of the screen on the **Tasks** page. To edit a task, click **Edit** in the corresponding row of the **Tasks** table. To delete a task, click **Delete** in the corresponding row of the **Tasks** table.
STEP 7. Add or Edit tasks using the following fields:

Field Label	Notes
Task Description*	The responsibility related to the tasks or mitigations (required). This field is read-only.
Task Due*	Using the mm/dd/yyyy format, enter the expected completion date for the tasks (required).
Task Completed	Using the mm/dd/yyyy format, enter the date the tasks were completed.
Task Assigned Responsibility List	Check the checkbox next to the responsibility/person the task is assigned to. You can assign a task to more than one person by checking multiple boxes. When you save the person(s) assigned the task will receive an email with their task assignment.

STEP 8. Click **Save** to save additions/changes to the database. View this information on the **Tasks** view page.
–**OR**–
Click **Cancel** to exit without saving and return to the **Tasks** view page**.**

4. Step 4: Natural / Cultural Compliance

4.1 Complete Environmental Screening Form (ESF)

STEP 1. From a Project, select the **Natural/Cultural Compliance** link in the left navigation.
STEP 2. View current responses entered in the ESF(New).
STEP 3. To update the ESF, select the **Edit** link at the top right of page or click the **Edit** link under the **ESF**

bullet in the left navigation.
STEP 4. Using the mm/dd/yyyy format, enter the date the ESF was initiated and enter this in the **Form Initiated** field.
STEP 5. Select the level of effect for the items under Resource Effects to Consider. Enter additional information under Data Needed to Determine. Data entry is limited to 2000 characters for each question.
STEP 6. If you have additional questions that are specific to your park or region you can add those questions via ADMIN, **Lookup tables**, **ESF Addendum Lookup table**. The questions entered via the lookup table then appear on the screen form, under **ESF Park Addendum Questions**. You can also attach a file(s) that contains additional information.

STEP 6.1 Click the More Information Provided in Addendum check box.
STEP 6.2 Add Park Addendums using the following fields:

Field Label	Notes
Title	Enter the name or title of the file.
Link Location	Enter the location of any file that relates to the ESF. These may be files that already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File	Enter the path and file name to be uploaded. -- OR --Click on **Browse…** and locate the file to be uploaded. Click on **Open.** The path and filename will appear in the File Upload field. See **PEPC Guide: Uploading Files and Images** for more information

STEP 7. Click **Add Addendum**. The file appears in the **Park Addendums List** table. Once added, if you need to delete the file, click the **Delete** check box. The file will be deleted when the form is saved.
STEP 8. Select **Yes**, No**, or N/A** for questions under **Mandatory Criteria**. If you select **Yes** enter additional information under **Data Needed to Determine**. Data entry is limited to 2000 characters for each question.
STEP 9. Update **Other Information** using the following form elements:

Field Label	Notes
Question 1	Select Yes or No, or N/A.
Question 1A	This field is read-only. If you entered a site visit in PEPC for this project **Yes** will be selected. To view the list of site visits for this project select the Site Visits link under **Internal Scoping**. See **PEPC Guide: Project Planning & Public Communication: Step 3** for more information
Question 2	Select Yes or No
Question 2A	If Yes above, enter plan name.
Question 2B	Select Yes, No, or N/A.
Question 2C	Select Yes, No, or N/A. Select radio button for document type and enter Approved date.
Question 3	Select Yes, No, or N/A.
Question 3A	Select Yes, No, or N/A.
Question 4	Select Yes, No, or N/A.
Question 5 Enter ESF Signed Date	Select Yes, No, or N/A. When the ESF is signed by the Superintendent., enter the date signed in this field.

STEP 10. Click Save to save additions/changes to the database. View this information on the ESF view page.
–**OR**–
Click Cancel to exit without saving and return to the ESF view page.

4.2 Determine NEPA Type

STEP 1. From a Project, select the Natural/Cultural Compliance link in the left navigation.
STEP 2. Select the Edit link under NEPA.
STEP 3. Select CE, EA, EIA, Memo to File, or Other for the NEPA Type that applies to the project.

TIP: Printing the NEPA page along with the ESF constitutes the Memo to File.

TIP: Changing the NEPA type for a project that already has completion dates entered will overwrite your previous NEPA type and associated completion dates.

If you just need a 'Memo to File' for a project that already has an existing NEPA type and associated completion dates, use the print forms function under Step 4 and upload your completed memo back to Step 5.

If this is a new project covered by this project's existing compliance document, you should create a new PEPC project.)

STEP 4. Click on **Select Type.** The appropriate fields will display based on the selected **NEPA Type.**
STEP 5. Populate fields to track the required NEPA steps.
STEP 6. Click **Save** to save additions/changes to the database. View this information on the **NEPA** view page. The **NEPA** view page will display the current NEPA status based on populated dates.
–OR– Click **Cancel** to exit without saving and return to the **NEPA** view page**.**

4.3 View/Edit Mitigations

STEP 1. From a Project, click on the Natural/Cultural Compliance link in the left navigation.
STEP 2. Click on the Mitigations link in the left navigation.
STEP 3. By default the Mitigation List contains a list of all mitigations for the project. To assist in finding the mitigation in which you are interested, the list can be narrowed using Filters.
STEP 4. The following filters are available:

Field Label	Notes
Responsibility	Displays only those mitigations associated with the selected Responsibility.
Mitigation Type	Displays only those mitigations that are associated with the selected Mitigation Type.

STEP 5. Click on Search. The Mitigation List is filtered according to the criteria selected.
STEP 6. To create a new mitigation, click on the Create Mitigation link at the top right area of the screen on the Mitigations page. To view a mitigation click the Responsibility link in the corresponding row of the Mitigation List table. To edit a mitigation, click Edit in the corresponding row of the Mitigation List table. To delete a mitigation, click Delete in the corresponding row of the Mitigation List table.

NOTE: Standard mitigations can be added via ADMIN, **Lookup Tables, Mitigations**. They then can be selected from a drop-down list instead of adding them one by one. Click on Create Mitigation. Select the responsibility type, the mitigation type and then click on the blue link to the list of Park Mitigations. The Mitigations open in a new window. You can either highlight, drag and drop of copy and paste the mitigation you choose into the Mitigation text box. Click Save to save your entries to the database.

STEP 7. Add or Edit mitigations using the following fields:

Field Label	Notes
Responsibility*	The responsibility related to the mitigation (required).
Mitigation Type*	Select the Mitigation Type (required).
Mitigation*	Enter a detailed description of the mitigation.

STEP 8. Click Save to save additions/changes to the database. View this information on the Mitigation view page.
–OR–
Click Cancel to exit without saving and return to the Mitigation view page.

4.4 Evaluate for NHPA/CRM

STEP 1. From a Project, click on the **HNPA/CRM** link in the left navigation.
STEP 2. Click on the **Edit** link under the **NHPA** bullet in the left navigation.

STEP 3. Answer **Questions** using the following form elements:

Field Label	Notes
Question A	Select Yes or No. Enter additional comments in the Comment text box.
Question B	Select Yes or No for both questions. Enter additional comments in the Comment text box.
Question C	Select Yes or No.
Question D	Select Yes or No. If Yes, select the historical resource from the dropdown list. (These can be added in the Admin, Historical Resources Lookup table for your park).
Question E	Select Yes or No. If Yes, select the historical resource from the dropdown list. (These can be added in the Admin, Historical Resources Lookup table for your park).
Question F	Select Yes or No.If Yes, select the historical resource from the dropdown list. (These can be added in the Admin, Historical Resources Lookup table for your park).
Question G	Select Yes or No. If Yes, select the historical resource from the dropdown list. (These can be added in the Admin, Historical Resources Lookup table for your park). If ethnographic resources are affected, answer Yes or No for if the interested parties have been contacted. Enter the date they parties were contacted.

STEP 4. Enter applicable Archeological (ARCH) or Archeological Resource Preservation Act (ARPA) information using the following form elements:

Field Label	Notes
Surveyor	Enter the name of the Surveyor.
ARCH Survey Required	Select Yes or No.
Started	Using the mm/dd/yyyy format, enter the date the archeological survey started.
Completed	Using the mm/dd/yyyy format, enter the date the archeological survey was completed.
Report Generated & Where Housed	Click the Yes or No radio button. If yes, enter the location where the report is housed.
ARPA Permit Required	Click in the check box marked **ARPA Permit Required** if an ARPA permit is required for this project.
Permit Number	Enter the ARPA Permit number.

STEP 4.1 Answer Questions using the following form elements:

Field Label	Notes
Question H	Select Yes or No. If Yes, select the peoples from the blue link (List of Traditionally Associated Peoples). The list can be populated by the Admin Traditionally Associated Peoples lookup table.
Question I	Select Yes or No. If Yes, select the peoples from the blue link (List of Traditionally Associated Peoples). The list can be populated by the Admin Traditionally Associated Peoples lookup table.
Question J	Select Yes or No. If Yes, select the peoples from the blue link (List of Traditionally Associated Peoples). The list can be populated by the Admin Traditionally Associated Peoples lookup table.
Question K	Select Yes or No. If Yes, select the peoples from the blue link (List of Traditionally Associated Peoples). The list can be populated by the Admin Traditionally Associated Peoples lookup table.
Question L	Select Yes or No. If Yes, select the peoples from the blue link (List of Traditionally Associated Peoples). The list can be populated by the Admin Traditionally Associated Peoples lookup table.
Question M	Select Yes or No. If Yes, select the peoples from the blue link (List of Traditionally Associated Peoples). The list can be populated by the Admin Traditionally Associated Peoples lookup table.

STEP 4.2 **Superintendent's Approval Date** - This is the date the AOE/XXX form is signed by the Superintendent. Complete this after the form has been signed.

STEP 4.3 Answer Questions using the following form elements:

Field Label	Notes
Question N	Select Yes or No.
Question O	Select Yes or No.
Question P	Select Yes or No
Question Q	Select Yes or No.

Question R	Select Yes or No.
Question S	Select Yes or No.
Question T	Select Yes or No.
Question U	Select Yes or No.
Question V	Select Yes or No.

STEP 5. Enter the Supporting Study Data in the Text box.

STEP 5.1 You can also link to or upload a file.

STEP 6. Select the determination of **Assessment of Effect**. Click Select.

TIP: Selections for Assessment of Effect and Documentation Method in combination determine the fields that must be used in managing the Consultation Letter (SHPO/THPO/ACHP) with the NEPA/NHPA document.

The following fields are displayed regardless of which choices are selected for Determination of Effect and Documentation Method:

Field Label	Notes
Date Entered By	Enter the name of the person who entered the information using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name* (Required), E-mail Address* (Required), Telephone and Extension. b. Click **Add Person** 5. Click **Select**. The person's name appears on the form in the name field.
Area of Potential Effect	Enter a description of the area of potential effect. Select the **List of Historical Resources** link to view a list of historical resources at the primary park for the project. Data entry is limited to 2000 characters.

STEP 7. Add a link or upload a file with information regarding the area of potential effect:

Field Label	Notes
Link Location	Enter the location of any file that relates to the Area of Potential Effect. These may be files that already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded **-- OR –** Click on **Browse…** and locate the file to be uploaded Click on **Open**. The path and filename will appear in the File Upload field.

STEP 8. Enter NHPA tracking information based on the selected Determination of Effect. If the Determination of Effect is **No Historic Properties Effected**, enter information using the following form fields:

Field Label	Notes
SHPO Required	Click in the check box marked **SHPO Required** if an SHPO consultation is required for this project.
Sent for Information	Using the mm/dd/yyyy format, enter the date a request for information was sent to the SHPO.
THPO Required	Click in the check box marked **THPO Required** if a THPO consultation is required for this project.
Sent for Information	Using the mm/dd/yyyy format, enter the date a request for information was sent to the THPO.

STEP 8.1 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.
-- OR -
Click **Cancel** to exit without saving and return to the **NHPA** view page.

STEP 9. If the Determination of Effect is **No Adverse Effect** and the Documentation Method is **Programmatic Exclusion** enter information using the following form fields:

Field Label	Notes
Documentation Method	Select **Programmatic Exclusion** and click **Select**.
Exclusion Used	Click on the arrow and select the exclusion used for this project from the list box. To view the full exclusion description, select the **Full Exclusion Descriptions** link.
Justification	Enter a detailed justification for the exclusion. Data entry is limited to 2000 characters.
SHPO Required	Click in the check box marked **SHPO Required** if an SHPO consultation is required for this project.

Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the SHPO.
Response Received	Using the mm/dd/yyyy format, enter the date the SHPO response was received.
THPO Required	Click in the check box marked **THPO Required** if a THPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the THPO.
Response Received	Using the mm/dd/yyyy format, enter the date the THPO response was received.

STEP 9.1 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.
-- OR -
Click **Cancel** to exit without saving and return to the **NHPA** view page.

STEP 10. If the Determination of Effect is **No Adverse Effect** and the Documentation Method is **Standard 4-Step Process** enter information using the following form fields:

Field Label	Notes
Documentation Method	Select **Standard 4-Step Process** and click **Select**.
Sent to Region	Using the mm/dd/yyyy format, enter the date the Assessment of Effect (XXX) was sent to the Region.
Received From Region	Using the mm/dd/yyyy format, enter the date the signed Assessment of Effect (XXX) was received from the Region.
Signed	Using the mm/dd/yyyy format, enter the date the Assessment of Effect (XXX) was signed by the Region.
Notes	Enter any additional information. Data entry is limited to 2000 characters.
SHPO Required	Click in the check box marked **SHPO Required** if an SHPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the SHPO.
Response Received	Using the mm/dd/yyyy format, enter the date the SHPO response was received.
THPO Required	Click in the check box marked **THPO Required** if a THPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the THPO.

STEP 10.1 View Mitigations associated with Assessment of Effect. To view the full mitigation, click the Mitigation ID.

STEP 10.2 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.
-- OR --
Click **Cancel** to exit without saving and return to the **NHPA** view page.

STEP 11. If the Determination of Effect is **No Adverse Effect** and the Documentation Method is **Combined NEPA/NHPA Document** enter information using the following form fields:

Field Label	Notes
Documentation Method	Select **Combined NEPA/NHPA Document** and click **Select**.
Letter to SHPO/THPO/ACHP Sent	Using the mm/dd/yyyy format, enter the date the letter was sent to the SHPO, THPO, or ACHP.
Sent to Region	Using the mm/dd/yyyy format, enter the date the Assessment of Effect (XXX) was sent to the Region.
Received From Region	Using the mm/dd/yyyy format, enter the date the signed Assessment of Effect (XXX) was received from the Region.
Notes	Enter any additional information. Data entry is limited to 2000 characters
SHPO Required	Click in the check box marked **SHPO Required** if an SHPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the SHPO.
Response Received	Using the mm/dd/yyyy format, enter the date the SHPO response was received.
THPO Required	Click in the check box marked **THPO Required** if a THPO consultation is required for this project.

Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the THPO.
Response Received	Using the mm/dd/yyyy format, enter the date the THPO response was received.

STEP 11.1 View Mitigations associated with Assessment of Effect. To view the full mitigation, click the **Mitigation ID.**

STEP 11.2 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.

-- OR --

Click **Cancel** to exit without saving and return to the **NHPA** view page.

STEP 12. If the Determination of Effect is **No Adverse Effect** and the Documentation Method is **Park Specific Programmatic Agreement,** enter information using the following form fields:

Field Label	Notes
Documentation Method	Select **Park Specific Programmatic Agreement** and click **Select**.
Notes	Enter additional information. Data entry is limited to 2000 characters.

STEP 12.1 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.

-- OR --

Click **Cancel** to exit without saving and return to the **NHPA** view page.

STEP 13. If the Determination of Effect is **Adverse Effect** and the Documentation Method is **Standard 4-Step Process** enter information using the following form fields:

Field Label	Notes
Documentation Method	Select **Standard 4-Step Process** and click **Select**.
ACHP Participating	Click in the check box marked **ACHP Participating** if an ACHP is participating in this process.
Sent	Using the mm/dd/yyyy format, enter the date the Consultation letter with the NEPA/NHPA document was sent to the ACHP.
Sent To Region	Using the mm/dd/yyyy format, enter the date the Assessment of Effect (XXX) was sent to the Region.
Received From Region	Using the mm/dd/yyyy format, enter the date the signed Assessment of Effect (XXX) was received from the Region.
Signed	Using the mm/dd/yyyy format, enter the date the Assessment of Effect (XXX) was signed by the Region.
Notes	Enter any additional information. Data entry is limited to 2000 characters.
SHPO Required	Click in the check box marked **SHPO Required** if an SHPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the SHPO.
Response Received	Using the mm/dd/yyyy format, enter the date the SHPO response was received.
THPO Required	Click in the check box marked **THPO Required** if a THPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the THPO.
Response Received	Using the mm/dd/yyyy format, enter the date the THPO response was received.
MOA Approval	Using the mm/dd/yyyy format, enter the date MOA approval was received.
Consultation Completed	Using the mm/dd/yyyy format, enter the date consultation was completed.
Mitigation Completed	Using the mm/dd/yyyy format, enter the date mitigation was completed.

STEP 13.1 View Mitigations associated with Assessment of Effect. To view the full mitigation, click the **Mitigation ID.**

STEP 13.2 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.

-- OR --

Click **Cancel** to exit without saving and return to the **NHPA** view page.

STEP 14. If the Determination of Effect is **Adverse Effect** and the Documentation Method is **Combined NEPA/NHPA Document** enter information using the following form fields:

Field Label	Notes
Documentation Method	Select Standard 4-Step Process and click Select.
Letter to SHPO/THPO/ACHP Sent	Using the mm/dd/yyyy format, enter the date the letter was sent to the SHPO, THPO, or ACHP.
ACHP Participating	Click in the check box marked **ACHP Participating** if an ACHP is participating in this process.
Sent	Using the mm/dd/yyyy format, enter the date the Consultation letter with NEPA/NHPA document was sent to the ACHP.
Sent to Region	Using the mm/dd/yyyy format, enter the date the Assessment of Effect (XXX) was sent to the Region.
Received From Region	Using the mm/dd/yyyy format, enter the date the signed Assessment of Effect (XXX) was received from the Region.
Notes	Enter any additional information. Data entry is limited to 2000 characters.
SHPO Required	Click in the check box marked **SHPO Required** if an SHPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the SHPO.
Response Received	Using the mm/dd/yyyy format, enter the date the SHPO response was received.
THPO Required	Click in the check box marked **THPO Required** if a THPO consultation is required for this project.
Sent	Using the mm/dd/yyyy format, enter the date the assessment of effect was sent to the THPO.
Response Received	Using the mm/dd/yyyy format, enter the date the THPO response was received.
MOA Approval	Using the mm/dd/yyyy format, enter the date MOA approval was received.
Consultation Completed	Using the mm/dd/yyyy format, enter the date consultation was completed.
Mitigation Completed	Using the mm/dd/yyyy format, enter the date mitigation was completed.

STEP 14.1 View Mitigations associated with Assessment of Effect. To view the full mitigation, click the **Mitigation ID.**
STEP 14.2 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.
--OR--
Click **Cancel** to exit without saving and return to the **NHPA** view page**.**

STEP 14.3. If the Determination of Effect is **Undetermined**, enter information using the following form fields:

Field Label	Notes
Notes	Enter additional information or reason determination of effect is undetermined. Data entry is limited to 2000 characters.

STEP 14.4 Click **Save** to save additions/changes to the database. View this information on the **NHPA** view page.
--OR--
Click **Cancel** to exit without saving and return to the **NHPA** view page**.**

4.5 NHPA/CRM Specialist Reviews

STEP 1. From a Project, click on the **Natural/Cultural Compliance** link in the left navigation.
STEP 2. Under the **NHPA/CRM Specialist Reviews** bullet in the left navigation, click on the **Edit** link to update current document details. The following list will be displayed.
STEP 3. Select the title matching your role in the review.

Archeologist
Historical Landscape Architect
Curator
Ethnographer

Historian
Historical Architect
Other Advisors

NOTE: You can view another advisor's review, but you can only edit your own review.

STEP 3.1 To create a new review click on the link under the Discipline name.

STEP 4. Your name should appear in the Specialist's name drop-down.

STEP 4.1 Enter your comments in the Comments box. The comments box allows 4000 characters.
STEP 4.2 Select the Assessment of Effect type.
STEP 4.3 Enter recommendations for conditions, or stipulations (4000 characters).
STEP 4.4 Enter date reviewed.

This information will print on the Assessment of Effect/XXX form.

4.6 Other Compliance/Consultations

STEP 1. From a Project, click on the Natural/Cultural Compliance link in the left navigation.
STEP 2. Under the Other Compliance/Consultations bullet in the left navigation, click on the Edit link to update current document details.

STEP 2.1 Update information related to the Endangered Species Act using the following form elements:

Field Label	Notes
Any Federal Species in the Project Area?	Select Yes or No.
If species in area	Select the effect the project will have on the Federal Species in the area.
Was a Biological Assessment prepared?	Select Yes or No.
Sent to FWS/NMFS	Using the mm/dd/yyyy format, enter the date the consultation was sent to the US Fish and Wildlife Service (FWS) or National Marine Fisheries Service (NMFS) for review.
FWS/NMFS Response	Using the mm/dd/yyyy format, enter the date a response was received from the US Fish and Wildlife Service (FWS) or National Marine Fisheries Service (NMFS).
Concurred	Select Yes or No.
Formal Consultation Required	Select Yes or No.
Formal Consultation Notes	Enter additional information regarding the formal consultation. Data entry is limited to 2000 characters.
Consultation Concluded	Using the mm/dd/yyyy format, enter the date the consultation was completed.
Any State Listed Species in the Project Area?	Select Yes or No.
Consultation Information	Enter additional information regarding the consultation. Data entry is limited to 2000 characters.
Data Entered By	Enter the name of the person who entered the information using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.

ESA Date Entered	Using the mm/dd/yyyy format, enter the date the information was completed.

STEP 2.1 Update information related to the Endangered Species Act using the following form elements:
STEP 2.2 View Mitigations associated with the Endangered Species Act. To view the full mitigation, click the **Mitigation ID.**
STEP 2.3 Update information related to Floodplains, Wetlands or §404 Permits using the following fields:

Field Label	Notes
A1	Select Yes or No. If yes, check exempt from compliance with Executive Order or enter the statement of findings approval date using the mm/dd/yyyy format.
A2	Select Yes or No. If yes, enter the statement of findings approval date using the mm/dd/yyyy format.
B	Select Yes or No. If yes, enter the COE Section 404 Permit issue date and expiration date using the mm/dd/yyyy format.
C	Select Yes or No.
D	Select Yes or No. If yes, enter the State Section 401 Permit issue date and expiration date using the mm/dd/yyyy format.
E	Select Yes or No.
F	Select Yes or No. If yes, enter the required and reviewed dates using the mm/dd/yyyy format.
G	Select Yes or No.
H	Select Yes or No. If yes, enter information about the permit, including permit title, permit number, issue date, and expiration date.
Data Entered By	Enter the name of the person who entered the information using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
F/W Entered Date	Using the mm/dd/yyyy format, enter the date this information was completed.

STEP 2.4 View Mitigations associated with Floodplains, Wetlands or §404 Permits.
To view the full mitigation, click the Mitigation ID.

STEP 2.5 Update information related to Other Permits and Laws using the following fields:

Field Label	Notes
A	Select Yes or No.
B	Select Yes or No.
C	Select Yes or No.
D	Select Yes or No.
E	Select Yes or No.
F	Select Yes or No.
G. Other	Specify any other permits or laws that affect this project. Select Yes or No.
Other Information	Enter additional information related to permits and laws that affect this project. Data entry is limited to 2000 characters.

Data Entered By	Enter the name of the person who entered the information using the **Person Search** feature. To add a name by using the **Person Search** feature: 1 . Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.

STEP 3. Click **Save** to save additions/changes to the database. View this information on the **Other Consultations** view page.
--OR-
Click **Cancel** to exit without saving and return to the **Other Consultations** view page**.**

STEP 4. You can upload or link a file pertaining to Other Consultations.

Field Label	Notes
Link Location	Enter the location of any file that relates to the Area of Potential Effect. These may be files that already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File Upload	Enter the path and file name to be uploaded **-- OR –** Click on **Browse…** and locate the file to be uploaded Click on **Open**. The path and filename will appear in the File Upload field. See PEPC Guide: Uploading Files and Images for more information.

4.7 Print Forms

(Environmental Screening Form (ESF New), Environmental Screening Empty Form (ESF New Empty Form), Assessment of Effect/Sec 106, Letter of Compliance Completion, Categorical Exclusion (CE), Other Compliance/Consultations, or Park ESF Addenum, Mitigations List, Memo to File, and Wilderness Minimum Requirements Analysis)

STEP 1. From a Project, click on the **Natural/Cultural Compliance** link in the left navigation.
STEP 2. To print a form, click on the **Print Forms** link in the left navigation.
STEP 3. Click on the Environmental Screening Form (ESF New), Environmental Screening Empty Form, Assessment of Effect/Sec 106,Letter of Compliance Completion, Categorical Exclusion Form (CE), Other Compliance/Consultation Form, Park ESF Addendum Form, Mitigations List Form, Memo to File, or Wilderness Minimum Requirements Analysis Form/Instructions.

STEP 3.1 To open the form, click Open.
STEP 3.2 To save the form, click Save.
STEP 3.3 To cancel and return to the Print Forms page, click Cancel.

5. Step 5: Internal Documents

5.1 Create an Internal Document

STEP 1. From a Project, click on the **Internal Documents** link in the left navigation.
STEP 2. To create a document, click on the **Create Document** link in the left navigation.

STEP 2.1 Create or update the internal document using the following form elements:

Field Label	Notes
Document Type*	Select the document type in the list box (required).
Title*	Enter the title of this document (required). Remember, one document may comprise multiple electronic files.
Description*	Enter description of the document (required). Data entry is limited to 2000 characters.
Peer Review Required	Select this check box if a peer review is required for this document.
Available to IDT members only.	Select this check box if the document is to be visible only to the IDT team.
Review Start	Using the mm/dd/yyyy format, enter the start date for the peer review of this document.
Review End	Using the mm/dd/yyyy format, enter the end date for the peer review of this document.
Email to IDT Members for Document Review	Select the checkbox when you are ready for email to go to the IDT that the document is open for review.

STEP 2.2 You may have one file or multiple files that together comprise a document. Add document files using the following fields:

Field Label	Notes
Title	Enter the name or title of the file. File names (not title!) should not contain special characters suchas ampersand '&', semicolon ' ; ', and other HTML reserve characters).
Link Location	Enter the location of any file that relates to the document. These files may already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File	Enter the path and file name. **-- OR --** Click on **Browse…** and locate the file to be uploaded. Click on **Open.** The path and filename will appear in the File Upload field.

STEP 2.3 Click **Add File**. The file appears in the **List of Files** table. For your convenience, you may order the presentation by editing the number in the **Order** column. Once added, if you need to delete a file, click the **Delete** check box. These changes will take place when the form is saved.

STEP 3. Click **Save** to save additions/changes to the database. View this information on the **Document** view page.
–OR–
Click **Cancel or Clear!** to exit without saving and return to the **Internal Documents** list page**.**

5.2 Review/Update/Delete Documents

STEP 1. From a Project, click on the **Internal Documents/Comments** link in the left navigation.
STEP 2. View documents available for past, present or future review in the **Internal Documents** table.

NOTE: Observe the **Review Start** and **Review End** dates. For documents currently under review, you will see **Yes** in the **In Review** column.

STEP 3. Click on the document in **Document Title** column for which you seek to review and comment. The **Document Details View** page appears. To view the document files, click on the link under the Title column in the List of Files table.
STEP 4. To update current document details, click on the Edit link at the top right of the page or click the Edit link under the Document Details bullet in the left navigation. See Create an Internal Document in this section for more information on editing a document.

Park and Region Administrators can delete documents. From the document list, click the 'Delete' link to remove documents. Note: Only Documents without 'Review Start' or 'Review End' dates can be deleted.

5.3 Comment on an Internal Document

STEP 1. From a Project, click on the **Internal Documents/Comments** link in the left navigation.
STEP 2. View documents available for past, present or future review in the **Internal Documents** table.

NOTE: Observe the Review Start and Review End dates. For documents currently under review, you will see Yes in the In Review column.

STEP 3. Click on the document in the **Document Title** column for which you seek to review and comment. The **Document Details View** page appears. To view the document files, click on the link under the **Title** column in the **List of Files** table.
STEP 4. Click on the **Comments/Responses** link in the left navigation. The **Internal Comments** list page displays. See **Review/Modify Comments** for more information.
STEP 5. Click on the **Create New Comment Set** link in the right side of the page. You may enter your comment using the following form fields:

Field Label	Notes
Commenter*	The Commenter box will automatically fill in with your name. If entering comments for someone else, enter the name of the person commenting on the document using the Person Search feature (required). The default is the current user. Enter the name of the person commenting on the document using the **Person Search** feature (required). The default in the current user. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Link Location	Enter the location of any file that relates to the document. These files may already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File	If you want to link to or add a file with your comments: Enter the path and file name. **-- OR –** Click on **Browse…** and locate the file to be uploaded. Click on **Open.** The path and filename will appear in the File Upload field.
Subject	Enter a subject for the comment you are creating. An example is Section 3: Alternatives and Constraints.
Chapter/Appdx	If this comment is related to a specific chapter or appendix in the document, enter the identifier here.
Page	If this comment is related to a specific page in the document, enter the page identifier here.
Paragraph	If this comment is related to a specific paragraph in the document, enter the paragraph identifier here. Note: **special characters such as hyphens(-) should not be used when entering Page numbers. If your comments span multiple pages, please enter the page on which your comment begins.**
Line	If this comment is related to a specific line in the document, enter the line identifier here.
Comment	Enter the comment (required). Include as much information as possible. Data entry is limited to 2000 characters.

STEP 6. Click **Add to List**. The Comment will appear in the List of Comments section. Once added, if you need to delete a comment, click the Delete check box. If you need to edit the comment, click Edit, make your corrections and click **Update Comment**.

If the comment is an editorial comment, check the Editorial checkbox.

To add multiple comments to your comment set repeat the above steps.
STEP 7. Click Save to save additions/changes to the database. View this information on the

Comments/Responses view page.
– OR –
Click Cancel to exit without saving and return to the Comments/Responses List page.
STEP 8. To add more comments to your Comment Set later, repeat steps 3 & 4 above. In the list of comment sets, click on **View** for your comment set. In the middle of the page click on 'Add more comments to comment set 'xxxx'. Continue adding comments by entering the subject, chapter/appendix, page, line (as needed), and comment. Click the '**Add Comment**' button. The comment will then display in the list of new comments and you can continue to add comments to your comment set in this manner. When done, remember to hit '**SAVE**' to avoid losing your comments.

5.4 Review/Modify Comments

STEP 1. From a Project, click on the **Internal Documents/Comments** link in the left navigation.
STEP 2. View documents available for past, present or future review in the **Internal Documents** table.

NOTE: Observe the **Review Start** and **Review End** dates. For documents currently under review, you will see **Yes** in the **In Review** column.

STEP 3. Click on the document in the Document Title column for which you seek to review and comment. The Document Details View page appears. To view the document files, click on the link under the Title column in the List of Files table.
STEP 4. Click on the Comments/Responses link in the left navigation. The Comments/Responses list page displays. Each row on this page represents a comment or a set of comments that were created in a group by the commenter.

STEP 4.1 To filter the list of comments, use one or a combination of the filters:

Field Label	Notes
Commenter	Enter the name of the commenter using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Date From	Using the mm/dd/yyyy format, enter a Date From date to include comments occurring on or after this date.
Date To	Using the mm/dd/yyyy format, enter a Date To date to include comments occurring on or before this date.
File Upload	Select "Yes" to see comments that include an uploaded file. Select "No" to see comments that do not include an uploaded file.

STEP 5. Click Search. The comment list appears based on the filter selected.
STEP 6. Select the View link for the comment set that you wish to review.

STEP 6.1. Review comment information. To edit comment information, click the Edit Comments link in the fourth column of the list.
STEP 6.2. Use the fields presented in Comment on an Internal Document in this section to add a comment and click 'Add to List'. Note: Do not add too many comments without saving as they are NOT saved to the database until you click the Save button.

STEP 7. Click Save to save additions/changes to the database. View this information on the Comments/Responses view page.

–**OR**– Click **Cancel** to exit without saving and return to the Internal Comment page.

5.5 Respond to a Comment

STEP 1. From a Project, click on the **Internal Documents/Comments** link in the left navigation.
STEP 2. View documents available for past, present or future review in the **Internal Documents** table.

NOTE: Observe the **Review Start** and **Review End** dates. For documents currently under review, see **Yes** in the **In Review** column.

STEP 3. Click on the document in the **Document Title** column for which you seek to respond to a comment. The **Document Details** view page appears.
STEP 4. Click on the **Comments/Responses** link in the left navigation. The **Comments/Responses** list page displays. View the comment set list. Select the comment set to respond to by clicking the View link for that comment set.
STEP 5. Select the Response button of the comment set to which you wish to respond.
STEP 6. You may enter your response using the following form fields:

Field Label	Notes
Responder*	This should automatically be filled in with your name. To enter the name of the person responding to the comment using the Person Search feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Status	Select a status for the response from the list box.
Response*	Enter the response. Data entry is limited to 2000 characters. (Response is a required field if the **All Comments Incorporated** check box is not selected.

STEP 7. Click **Save** to save additions/changes to the database. View this information on the **Comments/Responses** view page.
-- OR --
Click **Cancel** to exit without saving and return to the **Comments/Responses** view page**.** Or click on **Clear**! to clear the information entered and start again.
-- OR --
Click on **Clear!** to remove the information entered in the Response box and start again.

5.6 Review/Update Responses to Comments

STEP 1. From a Project, click on the **Documents/Comments** link in the left navigation.
STEP 2. View documents available for past, present or future review in the **Internal Documents** table.

NOTE: Observe the **Review Start** and **Review End** dates. For documents currently under review, see **Yes** in the **In Review** column.

STEP 3. Click on the document in the **Document Title** column for which you seek to respond to a comment. The **Document Details View** page appears.
STEP 4. Click on the Comments/Responses link in the left navigation. The Comments/Responses list page appears. View the comment set list. Click the View link to see the comments within the comment set.
STEP 5. Click on the **Respond** button for the response you wish to edit.

Note: If Status is "Review" then the comment has been updated since the last response. This comment should be reviewed to determine if the response should be modified.

STEP 6. Use the fields presented in **Respond to a Comment** in this section to edit the response.
STEP 7. Click **Save** to save additions/changes to the database. View this information on the **Internal Comments/Responses** view page.
-- OR --
Click **Cancel** to exit without saving and return to the **Internal Comments/ Response** page**.**
-- OR -- Click on **Clear!** to remove the information entered in the Response box and start again.

5.7 Review Internal Comments Report

The internal comments report provides an overview of the status of comments submitted for a document.

STEP 1. From a Project, click on the **Internal Documents/Comments** link in the left navigation.
STEP 2. View documents available for past, present or future review in the **Internal Documents** table.
STEP 3. Click on the document in the **Document Title** column for which you seek to view the **Internal Comments Report**. The **Document Details** view page appears.
STEP 4. Click on the **Comments/Responses Report** link in the left navigation.

STEP 4.1 To filter the report, use one or a combination of the filters:

Field Label	Notes
Comment Set	Enter the Comment GroupID to filter by.
Chap/Appx	Enter the chapter or appendix identifier.
Page	Enter the page identifier.
Para	Enter the paragraph identifier.
Line	Enter the line identifier.
Date Submitted From	Using the mm/dd/yyyy format, enter a Date Submitted From date to include comments occurring on or after this date.
Date Submitted To	Using the mm/dd/yyyy format, enter a Date Submitted To date to include comments occurring on or before this date.
Status	Select the status of comment from the list box.
Commenter	Enter the name of the Commenter here using the **Person Search** feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. 5. Click **Select.** The person's name appears on the form in the name field.
Subject	Enter subject text.
Comment/Response Text	Enter text string to search by - will search comments and responses.
Editorial	Select Yes to filter on only the Editorial comments. Default is All.

STEP 5. Click **Generate Report** to view the report.
STEP 6. A printable version of the report is available in HTML, Microsoft Word, or Excel format by clicking on the appropriate link.

6. Step 6: Public Communication

In this section, the public project home page is created and maintained. Pages created here can be published to the public site either when they are created or at a later date.

6.1 Create Public Project Home

NOTE: Each item under Step 6 has its own 'Published to Public checkbox' The Public Project Home MUST be published for the subsequent items to appear, and then only those that are checked to publish will appear on this home page.

STEP 1. From a Project, click on the **Public Communication** link in the left navigation. The **Public Project Home Page** appears.

STEP 2. The Public Project Home Page contains the text of the home page, the public contact information, an image, and information on the home page status including the date the page was last published and its current status (published to public or not published to public). NO information for this project will show to the public without having this home page created!

STEP 2.1 To create or update the **Public Project Home Page**, click on the **Edit** link at the top right of page or click the **Edit** link under the **Public Project Home** bullet in the left navigation.

STEP 2.2 Update the public document using the following form elements:

Field Label	Notes
Publish to Public Site	Select this check box to have the project home page appear on the public site. If this item is checked, the page will be published to the public site. The PEPC application will confirm this selection when the page is saved.
Text*	Enter the text to appear on the public site (required). Describe the project, its goals and key stakeholders, explain how the project is aligned with the mission of the National Park Service, solicit comments, etc. Text from the Superintendent's Note may also be placed here. Remember this is online information. Keep it brief! Limit your text to approximately 3 paragraphs. Data entry is limited to 4000 characters.
Project Contact	Enter contact information for the person to contact regarding this project. Data entry is limited to 250 characters. It is suggested you do NOT enter an email address here. PEPC is the approved electronic format for entering comments.
Image	Enter the URL for an image or click **Browse**... and navigate to the image file and click **Open**. Although any size image may be used, the suggested image size is 200 x 300 pixels. Images larger than the suggested size will be automatically resized to fit. The image can be replaced after it is uploaded, should it prove dissatisfactory. In Windows Explorer, if you mouse over the image file it will show you the image size. Acceptable file types include jpg, jpeg, gif, and png.
Image Description	Enter text which describes the photo when the image cannot be seen (i.e. if a text reader is used). This must be descriptive such as 'photo of the existing stone North District visitor center with patched roof' instead of 'photo of visitor center. This is '508 Compliance'.
Short Link	Short links can be created here for people to remember and reach your project. Short links must be standard characters with no slashes, spaces or quotes and must start with a letter. For instance you could enter 'MyProject123' so that your project could be accessible with the URL 'http://parkplanning.nps.gov/MyProject123' To check to see if your link is unique, click on the **check unique** button. Remember to use this **as needed** since this link can only be used **once**.

STEP 3. Click **Save** to save additions/changes to the database. If the **Publish to Public Site** check box is selected, you will be prompted "Are you sure you want to publish this to the public?" Select **OK** to publish to the public site or **Cancel** to return to the **Public Project Home Page** (**Edit)** page to deselect the **Publish to Public Site** check box. Click **Save.** View this information on the **Public Project Home Page** view page.

--OR--

Click **Cancel** to exit without saving and return to the **Public Project Home Page** view page**.**

NOTE: In order for Documents, the Plan Process, Meeting Notices or Links to appear on the Public site, the Project Home Page Must be Published! You can publish the home page as a public preview to the project, then publish the document when you are ready for review.

6.2 View/Edit Plan Process

STEP 1. From a Project, click on the **Public Communication** link in the left navigation. The **Public Project Home Page** appears.

STEP 2. Click on the **Edit** link under the **Plan Process** bullet in the left navigation. (The **View** link will allow you to view any information that has already been entered.)

STEP 2.1 Create or update the plan process using the following form elements:

Field Label	Notes
Publish to Public Site	Select this check box to have the plan process information appear on the public site. Make sure that the check box is also selected on the **Public Project Home** page; both need to be selected for this information to display on the public site.
Introduction	Enter the text to describe the process you will follow for this project to the public. Data entry is limited to 2000 characters.
Conclusion	Once a project has been complete, this is where you enter what the result of the project is. This is an important step to keep the public informed!. Data entry is limited to 2000 characters.
Step Description	1. Enter text for a step. 2. Click **Add Step**. The step displays in the List of Steps table. 3. Continue adding steps until all steps have been added. Each step receives a step number. Steps appear in the order they are entered. Step order may be edited if necessary. Changes will take effect when the page is saved. 4. Click the radio button associated with the step that is current. **Note:** You can add p a step from the typical step list into your step list by clicking on the **add+** button.

STEP 3. Click **Save** to save additions/changes to the database. If the **Publish to Public Site** check box is selected, you will be prompted "Are you sure you want to publish this to the public?" Select **OK** to publish to the public site or **Cancel** to return to the **Plan Process** edit page and deselect the **Publish to Public Site** check box. Click **Save.** View this information on the **Plan Process** view page or on the public site by selecting the **Plan Process** link in the left navigation on the project's **Public Project Home** page.

--OR--

Click **Cancel** to exit without saving and return to the Public Documents page, or select Clear! to clear the page prior to saving in order to re-enter data.

6.3 View/Edit Meeting Notices

STEP 1. From a Project, click on the **Public Communication** link in the left navigation. The **Public Project Home Page** appears.

STEP 2. Click on the **Edit** link under the **Meeting Notices** bullet in the left navigation. (The **View** link will allow you to view any information that has already been entered.)

STEP 2.1 Create or update meeting notices using the following form elements:

Field Label	Notes
Title*	Enter the title of the meeting (required).
Meeting Notice Text*	Enter an introduction to the meeting (required).
Description*	Enter information describing the purpose and goals to be achieved at the meeting (required). Provide information of speakers or special presentations of interest to the public. Data entry is limited to 2000 characters.
Date*	Using the mm/dd/yyyy format, enter the date of the meeting (required).
Start Time*	Select the starting time in hours, minutes and AM or PM from the list boxes (required).
End Time*	Select the ending time in hours, minutes and AM or PM from the list boxes (required).). Note: The start time and end time cannot be the same.
Location*	Enter the name of the facility or location where the meeting occurs (required).
Address 1*	Enter the first line of the address for the meeting (required).
Address 2*	Enter the second line of the address for the meeting.
City*	Enter the City (required).
State/Province*	Select the State from the drop-down list if within the USA, otherwise use the text box.
Telephone	Enter the telephone number of the facility or point of contact for the meeting.

Meeting Directions	You can give written direction to the meeting place.

STEP 3. Click the 'Add Meeting Notice' button bar.. The meeting displays in the List of Meeting Notices table. Continue adding meeting notices until all meetings are listed in the List of Meeting Notices table. Any changes to the list of meeting notices will be saved when the page is saved. Meeting notices listed in the **List of Meeting Notices** table may be edited by selecting its corresponding **Edit** link. After selecting the **Edit** link, all fields listed in the previous step may be edited. Meetings with the **Delete** check box selected will be deleted when the page is saved. Meetings with the **Publish** check box selected will be published to the public site when the page is saved.

You may **COPY** a meeting by selecting the Copy link next to a meeting in the list. When you click the link the fields above are populated with the same fields as the meeting you copied. You can then change what is different (for example a different location or a different time, then click the 'Add Meeting Notice' button bar.

STEP 4. Click **Save** to save additions/changes to the database. If a Publish check box is selected, you will be prompted "Are you sure you want to publish this to the public?" Select OK to publish to the public site or Cancel to return to the Meeting Notices edit page and deselect the Publish check box. View this information on the Meeting Notices view page or on the public site by selecting the Meeting Notices link in the left navigation on the project's Public Project Home page.
-- OR --
Click **Cancel** to exit without saving and return to the Meeting Notices view page.

6.4 View/Edit Related Links

STEP 1. From a Project, click on the **Public Communication** link in the left navigation. The **Public Project Home Page** appears.
STEP 2. Click on the **Edit** link under the **Links** bullet in the left navigation. (The **View** link will allow you to view any information that has already been entered.)

STEP 2.1 Create or update links to websites with related information.

Field Label	Notes
Publish to Public Site	Select this check box to have the links appear on the public site. Make sure that the check box is also selected on the **Public Project Home** page; both need to be selected for this information to display on the public site.
Name	Enter the name of the link. This is the text that will be displayed on the public site as a link.
URL	Enter the web address of the link.

STEP 3. Click **Add Link**. The link displays in the **List of Links** table. Continue adding links until all links are listed in the **List of Links** table. Links appear in the order they are entered. The order may be edited. Changes will take effect when the page is saved.
STEP 4. Click **Save** to save additions/changes to the database. If the **Publish to Public Site** check box is selected, you will be prompted "Are you sure you want to publish this to the public?" Select **OK** to publish to the public site or **Cancel** to return to the **Links** edit page and deselect the **Publish to Public Site** check box. View this information on the **Links** view page or on the public site by selecting the **Documents & Links** link in the left navigation on the project's **Public Project Home** page.
--OR--
Click **Cancel** to exit without saving and return to the **Links** view page**.**

6.5 View a Summary of Public Communication

The best way to see what you have published is to check the **Summary** link in the left navigation.

STEP 1. From a Project, click on the **Public Communication** link in the left navigation. The **Public Project Home Page** appears.

STEP 2. Click on the **Summary** link in the left navigation.
STEP 3. View summary information on the public project home page, plan process, meeting notices, and related links.

6.6 Create a Public Document

STEP 1. From a Project, click on the **Public Communication** link in the left navigation. The **Public Project Home Page** appears.
STEP 2. Click the **Create Document** link in the left navigation. The **Create Public Document** page displays.
STEP 3. Create a document for public review using the following fields:

TIP: Both **Review Start** and **Review End** dates are required to make the document available for review by the public.

Field Label	Notes
Publish to Public Site	Select this check box to have the document appear on the public site. Make sure that the check box is also selected on the **Public Project Home** page; both need to be selected for this information to display publicly.
Date Document Posted	Initially blank, will be filled in when the page is saved.
Document Type*	Select the type of document from the list box (required).
Title*	Enter the title of the document (required). Remember one document may comprise multiple electronic files.
Description*	Enter the description of the document (required). Data entry is limited to 100 characters.
Short Link	Short links can be created here for people to remember and reach a specific document. Short links must be standard characters with no slashes, spaces or quotes and must start with a letter. For instance you could enter 'MyProject123' so that your project could be accessible with the URL 'http://parkplanning.nps.gov/MyProject123' To check to see if your link is unique, click on the **check unique** button. Remember to use this **as needed** since this link can only be used **once**.
Topic Questions:	If you have specific questions you would like the public to address in their correspondence, you can enter them here as a list.
Topic Question Instructions:	Enter instructions for the topic questions, for example if you have them numbered above, you would instruct the public user to number their comments according to the corresponding topic question number.
Review Start	Using the mm/dd/yyyy format, enter the start date for the public review of this document.
Review End	Using the mm/dd/yyyy format, enter the end date for the public review of this document. The review end date is interpreted by PEPC as midnight, Mountain time.
Postal Address	Enter the P.O. Box or other identifying information, street, city, state and ZIP Code to which the public should mail their comments. PEPC is the approved electronic format for entering comments. We must also provide a way for them to mail hard copy comments. It is highly suggested you do NOT provide an email address.
Title	Enter the public title of the document here. A descriptive name for the file that will appear on the public site. On the public site, this name will appear as a link. Clicking this link will allow a public user to download the file or view it on screen. It is strongly suggested to upload .pdf format files as these are a more standard format.
File	You may have one file or multiple files that together comprise a document. Enter the path and file name of the document to be uploaded. **Note:** the filename for the file you want to upload should not contain special characters such as '%' or '&' -- OR -- Click on **Browse…** and locate the file to be uploaded. Click on **Open**. The path and filename will appear in the File Upload field.

STEP 4. Click **Add File** to add this file to the List of Files table. Continue adding files until all files associated with this document are listed in the List of Files table. Files will appear in the table in the order

added. For your convenience, you may change the order of the files by editing the number in the Order column. Once added, if you need to delete a file, click the Delete check box. Changes will take effect when the page is saved.
STEP 5. Click **Save** to save additions/changes to the database. If the Publish to Public Site check box is selected, you will be prompted "Are you sure you want to publish this to the public?" Select **OK** to publish to the public site or **Cancel** to return to the Create Document page and deselect the Publish to Public Site check box. View this information by selecting Public Documents & Comment Analysis in the left navigation or on the public site by selecting the Documents & Links link in the left navigation on the project's Public Project Home page.
-- OR --
Click **Cancel** to exit without saving and return to the Public Documents page, or select **Clear!** to clear the page prior to saving in order to re-enter data.

NOTE: Once created, this public document can be updated by selecting **Step 7: Public Documents & Comment Analysis** in the left navigation. For more information, see PEPC Guide: Project Planning & Public Communication: Step 7 Review/Update Documents for more information.

6.7 Documents

This page shows the documents available for past, present or future review in the Public Documents table. It contains the Public Documents table showing the documents by Title, Review Start, Review End, In Review, IDT Only, and has the option to Delete the document from the system. (Only Regional and Park Administrators can delete documents. Only documents without 'Review Start' and 'Review End' Dates can be deleted.)

NOTE: Observe the Review Start and Review End dates. For documents currently under review, you will see Yes in the In Review column.

7. Step 7: Public Documents & Comment Analysis

There are multiple channels of information for comments, web form from the public site, hard copy letter, etc. As documents are posted to the public web site (See **PEPC Guide: Project Planning and Public Communication: Step 6)**), the public has the opportunity to become informed and may submit comments based on the information learned. In this way the NPS includes public opinion in their decision-making process.

7.1 Review/Update Documents

STEP 1. From a Project, click on the Public Documents & Comment Analysis link in the left navigation.
STEP 2. The Documents page opens initially.
STEP 3. View documents available for past, present or future review in the Public Documents table.

NOTE: Observe the Review Start and Review End dates. For documents currently under review, you will see Yes in the In Review column.

STEP 4. Click on the document in the Document Title column for which you seek to view details. The Document Details View page appears.
STEP 5. The Document Details view page displays the following information: whether or not the document is currently published to the public site, the document type, a description of the document, start and ending public review dates, addresses for comments, correspondence, master form letters, comments, concerns, responses, and a list of files associated with the document.

STEP 5.1 To update current document details, click on the Edit link at the top right of page or click the Edit link under the Document Details bullet in the left navigation.
STEP 5.2 Update the public document using the following form elements:

TIP: Both Review Start and Review End dates are required to make the document available for review by the public.

Field Label	Notes
Publish to Public Site	Select this check box to have the document appear on the public site. Make sure that the check box is also selected on the Public Project Home page; both need to be selected for this information to display publicly.
Document Type*	Select the document type in the list box (required).
Title*	Enter the title of the document (required). Remember one document may comprise multiple electronic files.
Description*	Enter the description of the document (required). Data entry is limited to 100 characters.
Topic Questions	If you have specific questions you would like the public to address in their correspondence, you can enter them here as a list.
Topic Question Instructions	Enter instructions for the topic questions, for example if you have them numbered above, you would instruct the public user to number their comments according to the corresponding topic question number.
Review Start	Using the mm/dd/yyyy format, enter the start date for the public review of this document.
Review End	Using the mm/dd/yyyy format, enter the end date for the public review of this document. The review end date is interpreted by PEPC as midnight, Mountain time.
Postal Address	Enter the P.O. Box or other identifying information, street, city, state and ZIP Code to which the public should mail their comments. PEPC is the approved electronic format for entering comments. We must also provide a way for them to mail hard copy comments. It is highly suggested you do NOT provide an email address.
Title	Enter the public title of the document here. A descriptive name for the file that will appear on the public site. On the public site, this name will appear as a link. Clicking this link will allow a public user to download the file or view it on screen. It is strongly suggested to upload .pdf format files as these are a more standard format.
File	You may have one file or multiple files that together comprise a document. Enter the path and file name of the document to be uploaded. **Note:** the filename for the file you want to upload should not contain special characters such as '%' or '&' **-- OR --** Click on **Browse…** and locate the file to be uploaded. Click on **Open**. The path and filename will appear in the File Upload field.

TIP: DO NOT ADD each FILE as a separate document. For example a **document** might be 'Draft EIS'. This one document may be comprised of multiple files (one per chapter, appendix, etc.)

STEP 5.3 Click **Add File**. The file appears in the List of Files table. Files appear in the order entered. For your convenience, you may change the order of the files by editing the number in the Order column. Once added, if you need to delete the file, click the Delete check box. All changes will take effect when the page is saved.

STEP 6. Click **Save** to save additions/changes to the database. View this information on the Document Details view page.
-- OR --
Click **Cancel** to exit without saving and return to the Document Details view page.

7.2 Create Correspondence

This section describes the steps for adding a correspondence to PEPC in a form other than a comment from the public site (e.g. letter, e-mail).

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet in the left navigation.
STEP 3. Click on the document to which the correspondence refers in the **Document Title** column of the **Public Documents** table.

STEP 4. Click on the Correspondence link in the left navigation. The Correspondence List appears.
STEP 5. Click the **Enter More** link at top right of page.
STEP 6. If this piece of correspondence is a form letter, select an option in the **Choose Master Form Letter** list box.

STEP 6.1 If it is a master form letter, select THIS IS A MASTER FORM LETTER.
STEP 6.2 If this piece of correspondence is a form letter, and the master already exists in PEPC, select the master that it matches. To compare a potential form letter with a master, select the master in the list box and click **Open to Compare.** The master form letter will open in a separate window for comparison. **Note:** The Open to Compare button is only available when a master form letter is available and selected. Skip to Step 10.

NOTE: The master form letter is typically the first correspondence received for a form letter campaign. Existing and later correspondence are compared to the MASTER to determine Form Letter Status. Specifically, when a correspondence is created or is received from the public site, a comparison is done to see if it matches identified MASTER FORM LETTER.. If the new correspondence matches a MASTER within 90% the Form Letter Status is set to 'Yes'. If the correspondence contains the same body text, but is not within the 90% match, the Form Letter Status is set to "Potential".

STEP 7. Enter information regarding the author of the correspondence using the following form elements:

Field Label	Notes
Keep Private	Select this check box to keep the author's information private.
Unknown	If no author information was given, check the Unknown checkbox
First Name*	Enter the author's first name (required).
MI	Enter the author's middle initial.
Last Name*	Enter the author's last name (required).
Organization	Enter the organization to which the author belongs, if any.
Organization Type *	Select the type of organization to which the author belongs from the list box.
Address 1*	Enter the first line of the author's address (required).
Address 2	Enter the second line of the author's address.
City*	Enter the author's city (required).
State/Province*	Select or enter the author's state or province (required).
Postal Code *	Enter the author's postal code (required).
Country	Select the author's country.
E-mail	Enter the author's e-mail address.

STEP 8. Enter information about the correspondence using the following fields:

Field Label	Notes
Status	Select a status from the dropdown list box.
Park Corr. Log	Enter the correspondence log information. For example, include internal tracking IDs, if any.
Type*	Select the type of correspondence from the list box (required).
Number of Signatures	Enter the number of signatures if there are multiple people represented in a correspondence.
Date Sent	Using the mm/dd/yyyy format, enter the date that the correspondence was sent.
Date Received*	Using the mm/dd/yyyy format, enter the date that the correspondence was received at the NPS (required).
Notes	Enter any information about this correspondence that you would like to note. Data entry is limited to 2000 characters.

STEP 9. Enter the text of the correspondence into the Correspondence Text* data entry box (required).
STEP 10. Click **Save** to save additions/changes to the database. View this information on the **Correspondence** page.
--OR--
Click **Cancel** to exit without saving and return to the **Correspondence** page.

7.3 Review Correspondence

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. To review correspondence click on the document title in the **Document Title** column. The **Document Details** view page appears.
STEP 3. Click on the **Correspondence** link in the left navigation. The Correspondence List appears.

STEP 3.1. To filter the list of correspondence, use one or a combination of the **Filters**:

Field Label	Notes
Author Last Name	You can enter the author's last name, or portion of their last name.
Org. Type	Select the type of organization or group from the list box.
Status	Select the status of the correspondence from the dropdown list.
ID	Enter the correspondence ID of the individual correspondence.
Form Letter	Select the form letter identifier from the dropdown list box.
Date From	Using the mm/dd/yyyy format, enter a Date From date to include correspondence occurring on or after this date.
Date To	Using the mm/dd/yyyy format, enter a Date To date to include correspondence occurring on or before this date.
Organization	Exact Organization match only, no partial name search or single word search.
Correspondence Type	Select correspondence type from the dropdown list box.
Sort By	Sort by selections from the dropdown list box. Default is Correspondence ID

STEP 4. Click **Search.** The correspondence list appears based on the filter selected.
STEP 5. Select by clicking on the eyeglass(view) icon of the correspondence that you wish to review.

STEP 5.1 Review correspondence information. To edit identifying information, click the **Edit** link at the top right corner of the page.
STEP 5.2 Use the fields presented in **Create Correspondence** in this section**.**

STEP 6. Review the correspondence in the **Correspondence Text** section of the page.
STEP 7. Identify strings of text that present comments contained within the correspondence.

STEP 7.1 Select the text for each comment, then copy and paste, drag, or retype the text into the **Comment Text** data entry box in the **Add Comment** section of the page. Data entry is limited to 2000 characters.
STEP 7.2 Click **Save Comment.** The comment appears in the **Comments** table. Go to Step 7.1 and repeat until all comments are displayed in the **Comments** table.
STEP 7.3 To code the comments, go to **Code Comments** in this section.

STEP 8. Identify strings of text that present requests contained within the correspondence.

STEP 8.1 Select the text for each request, then copy and paste, drag, or retype the text into the **Request Text** data entry box in the **Add Public Request** section of the page. Select the type of request in the **Request Type** list box. Request Text is limited to 4000 characters.
STEP 8.2 Click **Save Request.** The request appears in the **Public Requests** table.

7.4 Public Requests

Generate a list of Public Requests and filter the list to find public requests matching the criteria entered.

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Select a document from the Document List.
STEP 4. Click the **Public Requests** link in the left navigation.
STEP 5. Filter the report using the following report criteria:

Field Label	Notes
Request Type	Choose a request type from the dropdown list.
Status	Choose a request status from the dropdown list.

Date From	Using the mm/dd/yyyy format, enter a Date From date to include public requests occurring on or after this date.
Date To	Using the mm/dd/yyyy format, enter a Date To date to include public requests occurring on or before this date.

STEP 6. View the list of public requests.
STEP 7. View Correspondence Information by selecting the request ID from the Public Request List table.

7.5 Code Comments

STEP 1. Follow steps 1 - 7 in Review Correspondence in this section.
STEP 2. Click on the Code link in the Code column of the Comments table for the comment you wish to edit or code.
STEP 3. Edit the Comment using the following fields:

Field Label	Notes
Status	Select the status of the comment from the dropdown list box. When the comment is first created the status is automatically set to "In Process". Once the comment is coded, this status needs to be changed to "Coded".
Page	Enter the page number of the document on which the comment is associated.
Paragraph	Enter the paragraph number within which the comment is associated.
Text*	The text that was added during **Review Correspondence** appears here (required). Edit the text here to correct typos only.
Notes	Enter any information that you would like to note about this comment. Data entry is limited to 2000 characters.
User*	The default is to be the current logged in user. Change as necessary.

STEP 4. Select the code that you would like to associate with this comment from the list box. Note: "S" indicates a substantive code and "N" indicates a non-substantive code.

STEP 4.1 If the appropriate code is not available in the list box, see **Manage Codes** in this section.

STEP 5. Click **Add Code**. The code will appear in the **Codes** table. If this comment is a supporting quote to substantiate the code, click the check box in the **Supporting Quote** column of the **Codes** table. Select the corresponding Delete check box to delete a code in the list. Changes will take effect when the page is saved.
STEP 6. Click **Save** to save additions/changes to the database. View this information on the **Comments** page.
--OR--
Click **Cancel** to exit without saving and return to the **Comments** page**.**

TIP. If you received only a few comments and you would like to make each one a concern, you can do so by checking the Concern checkbox. In this way you can respond to each comment without going through the complete process.

7.6 Content Analysis Report

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Click on the document title in the **Document Title** column. The **Document Details** view page appears.
STEP 4. Click on the **Content Analysis Report** link in the left navigation.
STEP 5. The complete report (all sections displayed at once) may be viewed or printed at once by using one of the Printable Version links. The HTML link will open the complete report in your browser. The Excel link will open the complete report in Microsoft Excel.
STEP 6. View the detailed sections by clicking on the link with the same name. Each link will expand just that area of the report.

- Comment Distribution by Code

- Comment Distribution by Status
- Correspondence Distribution by Correspondence Type
- Correspondence Signature Count by Organization Type
- Correspondence Distribution by State
- Correspondence Distribution by Country
- Media Report

7.7 Develop Concern Statements

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Click on the **Document Title**. The **Document Details** view page appears.
STEP 4. Click on the **Concerns** link in the left navigation.
STEP 5. Click the **Create Concern** link at the top right of the page.
STEP 6. Select the project-specific code from the list box for which this concern corresponds (required). Only codes that have been assigned to a comment are available. Note: "S" indicates a substantive code and "N" indicates a non-substantive code.

STEP 6.1 Create a concern using the following fields:

Field Label	Notes
Status	Select a status for the new concern from the dropdown list.
Concern Statement*	Enter the concern that best represents the comments for this code (required). Data entry is limited to 2000 characters.
Response Type	Select the type of decision that is needed from the dropdown list box.
Analyst *	Enter the name of the Analyst using the Person Search feature. To add a name by using the Person Search feature: 1. Click on the binoculars icon. A separate Person Search window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click Search. 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the Search Results table, continue by entering identifying information under the heading Add Person. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name* (Required), E-mail Address* (Required), Telephone, and Extension. b. Click Add Person 5. Click Select. The person's name appears on the form in the name field.
Completed Date	Using the mm/dd/yyyy format, enter the date that the concern is created.
Notes	Enter any notes related to this concern statement. Data entry is limited to 2000 characters.

STEP 6.2 To select a supporting quote to associate with this concern statement, select the **Use** check box next to the supporting quote. To disassociate the supporting quote from this concern statement, deselect the **Use** check box next to the supporting quote.
NOTE: To view the supporting quote, click on the **ID** in the **Comment ID** column corresponding to the **Supporting Quote**.

STEP 6.3 Click **Save** to save additions/changes to the database. View this information on the **Concern** page.
-- OR --
Click **Cancel** to exit without saving and return to the **Concerns** page**.**

7.8 Edit Concern Statement

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Click on the **Document Title**. The **Document Details** view page appears.
STEP 4. Click on the **Concerns** link in the left navigation.
STEP 5. Filter the list of concerns using the following **Filters**:

Field Label	Notes
ID	Enter the ID of the concern you wish to edit.
Status	Select a concern status from the dropdown list box.
Code	Enter the comment code to which the concern corresponds.
Analyst	Enter the name of the **Analyst** using the **Person Search** feature (required). To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. 5. Click **Select.** The person's name appears on the form in the name field.
Has Response	Choose Yes or No from the dropdown list.

STEP 6. Click Search. The concern list appears based on the filter selected.
STEP 7. Click the Edit link associated with the concern statement you want to edit.
STEP 8. To edit the concern statement, go to Develop Concern Statements: Step 7 in this section.

7.9 Prepare Responses

STEP 1. From the Concerns page, select the ID in ID column of the Concern List table corresponding to the project-specific code description.
STEP 2. Click the Create Response link at the top right area of the page.
STEP 3. Create a response using the following fields:

Field Label	Notes
Code*	This field is not editable. This is the code description associated with the Concern to which you are creating a response.
Status	Select a status from the list box.
Completed Date	Using the mm/dd/yyyy format, enter the date that this response will be completed.
Responder *	The responder field will default to the current logged on user. To change the responder, enter the name of the **Responder** using the **Person Search** feature (required). To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name* (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select**. The person's name appears on the form in the name field.
Response	Enter the response to the concern (required). Data entry is limited to 2000 characters
Notes	Enter any notes related to this response. Data entry is limited to 2000 characters.

STEP 4. Add a Management Notes File using the following fields:

Field Label	Notes
Title	Enter the title of the Management Notes File.
Link Location	Enter the location of any file that relates to the Management Note. These may be files that already reside on a server and you simply wish to access them from their current location rather than upload them to the PEPC database. Links may start with http:, https:, ftp:, or \\.
File	Enter the path and file name to be uploaded. **-- OR –** Click on **Browse…** and locate the file to be uploaded. Click on **Open.** The path and filename will appear in the File Upload field.

STEP 5. Click **Add File** The file will appear in the List of Management Notes Files. Continue adding files until all Management Notes Files are accounted for.
STEP 6. Click **Save** to save additions/changes to the database. View this information on the Responses view page.
-- OR --
Click **Cancel** to exit without saving and return to the Concerns view page.

7.10 Edit Response

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Click on the **Document Title**. The **Document Details** view page appears.
STEP 4. Click on the **Responses** link in the left navigation.
STEP 5. Filter the list of responses using the following **Filters**:

Field Label	Notes
ID	Enter the ID of the response you wish to edit.
Status	Select a response status from the dropdown list box.
Code	Enter the comment code to which the response corresponds.
Responder	Enter the name of the **Responder** using the **Person Search** feature (required). To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search**. 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name* (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select**. The person's name appears on the form in the name field.

STEP 6. Click Search. The response list appears based on the filter selected.
Click the Response ID.
STEP 7. Click the Edit link in the upper right corner of the page.
STEP 8. To edit the response, go to Prepare Responses: Step 3 in this section.

7.11 Sub/Non-Sub Report

The Sub/Non-Sub Report provides a summary of substantive or substantive codes and corresponding comments.
STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Select a document from the Document List.
STEP 4. Click the **Sub/Non-Sub Report** link in the left navigation.
STEP 5. Filter the report using the following report criteria:

Field Label	Notes
Substantive	Choose Yes or No from the dropdown list to filter for that value.
Type	Enter comments to get those with comments, or Codes w/o comments to find those codes which have no comments.
Code	Type the Code you wish to filter for.
Coder's Initials	Type the Code's Initials you wish to filter for.

STEP 6. View the list of correspondence.

STEP 6.1 The report may be viewed or printed by using one of the Printable Version links. The HTML link will open the report in your browser. The Word link will open the report in Microsoft Word.

7.12 Index By Organization Type Report

The Index by Organization Type report provides a summary of correspondence and associated codes by Organization Type

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Select a document from the Document List.
STEP 4. Click the **Index By Org. Type Report** link in the left navigation.
STEP 5. Filter the report using the following report criteria:

Field Label	Notes
Organization Type	Select the Organization Type from the dropdown list.
Organization	Type the name of the Organization you wish to filter for.
Code	Type the Code you wish to filter for.

STEP 6. View the list of correspondence sorted by Organization Type.

STEP 6.1 The report may be viewed or printed by using one of the Printable Version links. The HTML link will open the report in your browser. The Word link will open the report in Microsoft Word. The Excel link with open the report in Microsoft Excel.

7.13 Index By Code Report

The Index by Code report provides a summary of correspondence and associated organization by assigned code

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click on the **Documents** bullet.
STEP 3. Select a document from the Document List.
STEP 4. Click the **Index By Code Report** link in the left navigation.
STEP 5. Filter the report using the following report criteria:

Filter	Notes
Organization	Type the name of the Organization you wish to filter for.
Code	Type the Code you wish to filter for.

STEP 6. View the list of correspondence sorted by Code.

STEP 6.1 The report may be viewed or printed by using one of the Printable Version links. The HTML link will open the report in your browser. The Word link will open the report in Microsoft Word. The Excel link with open the report in Microsoft Excel.

7.14 Manage Codes for Entire Project

Before a user can begin coding comments, codes must be assigned for use on the project. A code represents a combined topic and issue statement. A project can use National, Park, or Project-specific codes.

STEP 1. From a Project, click on the Public Documents & Comment Analysis link in the left navigation. All Project, National, and Park codes identified for this project are displayed in the Manage Codes for Entire Project List.
STEP 2. To add codes to the project, click the Edit link under the **Manage Codes for Entire Project** link in the left navigation.
STEP 3. Choose the appropriate code(s) from the Park/National Code List (e.g. codes associated with the NEPA process, NPS Organic Act, NPS Management Policies, cumulative effects on air quality, etc) or from the Project Code List that is prepared by the project manager (alcohol prohibition, mandatory boater education, park zoning for off-road vehicles, etc.) To make the code(s) available when coding comments for this project, select the Use check box next to the code. To make a code unavailable when coding comments, deselect the Use check box next to the code. Select or deselect the Substantive check box for each code as appropriate to the project. Use a code number that is not used, and **number it to correspond with the proper location within the list**.

Generally, substantive comments are those that:

- question, with reasonable basis, the accuracy of the information in the EA/EIS
- question, with reasonable basis, the adequacy of the environmental analyses
- present reasonable alternatives or elements of alternatives other than those presented in the document
- provide information that could lead to changes or revisions in the proposal

STEP 4. If additional codes are needed, add project-specific codes to the Project Code List using the following form elements:

Field Label	Notes
Code*	Enter a project-specific code (required). The project specific code list is usually developed from the impact topics identified in the scoping report.
Substantive	Click this check box to identify the code as a substantive code. If this check box is not selected, the code is non-substantive per the project or NPS guidelines. Generally, substantive comments are those that: • question, with reasonable basis, the accuracy of the information in the EA/EIS • question, with reasonable basis, the adequacy of the environmental analyses • present reasonable alternatives or elements of alternatives other than those presented in the document • provide information that could lead to changes or revisions in the proposal
Description*	Enter a description of the project-specific code (required). Include all information that may be used for comment analysis and reporting. Data entry is limited to 100 characters.

STEP 4.1 Click **Add Project Code**. The code will appear in the Project Code List.

STEP 5. Click **Save** to save additions/changes to the database.
-- OR --
Click **Cancel** to exit without saving and return to the Manage Codes view page.

7.15 Entire Project Code Analysis Report

The Content Analysis Report provides a summary of number of comments per code across a project.

STEP 1. From a Project, click on the **Public Documents & Comment Analysis** link in the left navigation.
STEP 2. Click the **Entire Project Code Analysis Report** link in the left navigation.
STEP 3. View Comment Totals per Code.

Field Label	Notes
Report Date	Date when the respor t is run.
Number of Correspondence	Number of the Comments received.
Number of Comments	Number of the Comments received.
Code	Comment Code shown, if comment is coded
Code Description	Description of code
Substantive	Filled in with a Yes or No
Total Comments	Number of comments coded under particular description

STEP 3.1 The report may be viewed or printed by using one of the **Printable Version** links. The **HTML** link will open the report in your browser. The **Excel** link will open the report in Microsoft Excel.

7.16 Demographics Report

The Demographics Report provides a summary of the demographics information collected with Public comments for a project.

STEP 1. From a Project, click on the Public Documents & Comment Analysis link in the left navigation.
STEP 2. Click the Demographics Report link in the left navigation.
STEP 3. Filter the report using the following report criteria:

Field Label	Notes
Park	Choose park from pulldown list. The default is the project's park.
Project ID	Filled in by default with the PEPC Project ID
Document ID	Type the document ID if you want to run the report for a single document.
Correspondence ID	Type the correspondence ID of the individual correspondence if you only want the demographics information for one correspondence.
Org. Type	Select the name of the Organization you wish to filter by.
Receipt Date From	Using the mm/dd/yyyy format, enter a Receipt From date to include information occurring on or after this date.
Receipt Date To	Using the mm/dd/yyyy format, enter a Receipt To date to include information occurring on or before this date.
Fields to show	Select the checkbox or radio button of the items to show in the report (Name, Address, Email, Organization, Project Title, Correspondence, and Private info.

STEP 3.1 Click on 'Generate Report' after any changes to the criteria before selecting the print version.
STEP 3.2 The report may be viewed or printed by using one of the Printable Version links. The HTML link will open the report in your browser. The Excel link will open the report in Microsoft Excel.

8. Step 8: Close Project

STEP 1. From a Project, click on the Close Project link in the left navigation. The Close Project view page appears.
STEP 2. View information about the project status, public documents, and internal documents.
STEP 3. Click on the Edit link at the top right of the page or click the Edit link under the Close Project bullet in the left navigation.

Field Label	Notes
Project Status	Select the project status from the list box. When you update this field and save, the status on other pages will be updated as well. Closing a project is not a permanent change. If the need arises, the project status can still be changed in the future.
Project IClose	Using the mm/dd/yyyy format, enter the date that this project is closed. A project is closed when the record will no longer be updated.
GMP Planning Status	Set the appropriate status for GMP Planning or Non GMP Planning.

Non GMP Planning Status	
Actual Project Agreement	The date of the Actual Project Agreement - this should carry over from the Milestones, but may be entered here if the milestone date was not completed.
Actual Plan End	The date the Plan was complete.
Construction Status Construction End	Change the status to Closed or Closed Incomplete if applicable. Using the mm/dd/yyyy format, enter the date that the construction ended.
Day Labor/Park Personnel Status Day Labor/Park Personnel End	Change the status to Closed or Closed Incomplete if applicable.. Using the mm/dd/yyyy format, enter the date that the day labor ended.
Completion Report/Narrative	Enter the report information.
Compliance Status	Change the status of the compliance to Closed or Closed Incomplete.
Actual Compliance Complete	Enter the date the compliance process was completed for this project.
Sent to Curator	Using the mm/dd/yyyy format, enter the date that the curator receives project information. The curator will archive the information.
Park Accession Number	Enter the park accession number.
Region Accession Number	Enter the region accession number.
Filed	Select the check box if the project has been filed.
Archived	Select the check box if the project has been archived (closed out and placed in the park's archives).
Public Documents AND Internal Documents	Enter the TIC number to reference each public document. To remove project document files: 1. Click on the document title link. The document view page opens. 2. Click the Edit link in the top right of the page or click the Edit link under the Document Details bullet in the left navigation. 3. Click the Delete check box associated with the files to be removed

STEP 4. Click Save to save additions/changes to the database. View this information on the Close Project view page.
-- OR --
Click Cancel to exit without saving and return to the Close Project view page.

Uploading Files and Images

Linking Files

To link a file, the file must exist on an Internet or Intranet site with an http address or on an ftp server. Remember, the users you wish to share the file with must have access to the server on which the file is located. To link a file, first enter a title in the title field. Then enter either the http:// or ftp:// URL address.

For example for a file on a server with an http address: http://www.nps.gov/policy/DOrders/DOrder12.html or for a file on an ftp server: ftp://ftp.den.nps.gov/incoming/NRPC/PEPC Facts.doc

Uploading Files

There are several areas in the PEPC System where you can upload one or more files. Although there is no longer a restriction on the file size, it is recommended that files be no larger than 5MB. Once the file is uploaded it is stored on the system for access. To upload a file:

Field Label	Notes
Title	Enter the name or title of the file.
Link Location	Enter the location of the link here. Links start with http:, https:, ftp:, or \\.
File	Enter the path and file name to be uploaded. **-- OR –** Click on **Browse…** and locate the file to be uploaded. Click on **Open.** The path and filename will appear in the File Upload field.

Uploading Images

In addition to uploading files you are also able to upload images. An image can be uploaded in any area of the PEPC system that you can upload a file. To upload an image, follow the instructions for **Uploading Files** above.

To ensure the highest quality of your image, please do the following:

- Make sure the image is the appropriate size: 200 pixels x 300 pixels , recommended resolution is 72 dpi. To determine a file's size and resolution, in Windows explorer, right click on the image file, and go to Properties, then click on the Summary tab.
- If the image is a photograph, make sure it is a low resolution image and save it as an optimized .jpg file (this can be done using a graphics editing program like Adobe Photoshop).
- Use .gif for line art and other images in which geometric shapes are relatively simple
- .png files can also be uploaded. These are generally low resolution files. Usually no modifications are necessary.

Appendix A: PEPC E-mail Notification

The PEPC system will send e-mail as the result of certain user interactions with the system. System-generated e-mails are identified in the table below by **Trigger** - the action that causes the e-mail to be sent, **Sent To –** the person who will receive the e-mail, **When –** the delay, if any, between the trigger and the date the e-mail is sent, and **Where –** the area within PEPC where this trigger can be found.

Trigger	Sent To	When	Where
Create User	Newly Created User	Immediately	Admin
Request Role	Park or Region Admin(s) depending on the role type	Immediately	Admin
Grant/Deny Role	User who make the request	Immediately	Admin
Reset Password	User whose password was reset	Immediately	Admin
Create Project	Project Leader, NEPA and NHPA specialist assigned to the project	Immediately	Step 1 – Project Setup
Project Description/Title Change	Project Leader, NEPA and NHPA	User can choose to send an e-mail if the change is more than a minor edit	Step 1 – Project Setup
Target Dates are not met – not currently used	Project Leader	On target date – Message will be sent weekly!	Step 1 – Project Setup / Milestones
Adding an IDT member	IDT member	When assigned to the IDT	Step 3 - IDT
Assigning a task to an IDT member	IDT member	When a task is assigned	Step 3 - IDT
Scheduling a site visit or internal meeting	IDT member	User can choose to send an e-mail	Step 3 - IDT
Canceling a site visit or internal meeting	IDT member	Immediately	Step 3 - IDT
45 days after ROD NOA Published Date	Project Leader	45 days	Step 4 Natural-Cultural Compliance
Document Open for Review	IDT Team	A user can choose to send an e-mail	Step 5 – Document
Create/Edit Request, Immediate Attention type	Immediate Action Request Recipient	Immediately	Step 7-Document & Comment Analysis
Request has not been acted on in 48 hours	Unaddressed Request Recipient	48 hours	Public Requests
Close Project	Project Leader, NEPA and NHPA	Immediately	Step 1 Project Setup or Step 8-Close Project

Examples

An example of each type of e-mail generated by the system can be found below:

Create Project

Subject: PEPC: <Project Name> (<Project ID>)
Message Text:

The following project was created in the Planning, Environment and Public Comment (PEPC) system on 05/02/2003: Project ID: <Project ID> Project Title: <Project Name> Project Leader: <Name> Target Start Date: 2000-01-01 You can view the project information in your browser at the following URL:

https://pepc.nps.gov/projectHome.cfm?projectId=10001

Create User

Subject: PEPC: New User Account
Message Text:

A user account was created for you on the Planning, Environment and Public Comment System (PEPC): Username: <username> Password: <password> Please logon to PEPC and change your password at the following URL: https://pepc.nps.gov/userProfile.cfm?mode=edit

Request Role

Subject: PEPC: User Role Request
Message Text:

<Name> (<Username>) has requested the Region Administrator role for the Alaska Region. Please logon to the PEPC system to grant or deny role.

You can edit <Name>'s user profile at the following URL: https://pepc.nps.gov/userProfile.cfm?mode=edit

Grant/Deny Role

Subject: PEPC: Region role granted
Message Text:

The request for the Region Administrator role for the <Region Name> was granted.

--OR--
Subject: PEPC: Park role denied **Message Text:**

The request for the Park Administrator role for the <Park Name> was denied.

Reset Password

Subject: PEPC: Password Reset
Message Text:

Your password on the PEPC system was reset. Your new password is: <password> Please logon to PEPC and change your password at the following URL:

https://pepc.nps.gov/userProfile.cfm?mode=edit

45 days after ROD NOA Published Date

Subject: PEPC: ROD NOA Published 45 days ago: <Project Name> (<Project ID>)
Message Text:

The PEPC system has determined that the ROD NOA was published 45 days ago. Project ID: <Project ID> Project Title: <Project Name> ROD NOA Published Date: 04/20/2003 At this time, you should change the project status to closed complete and remove document files from

the system. If you have not already done so, send project files to TIC for record keeping and enter the TIC reference numbers on the close project page in the PEPC system. You can view the Close Project page in your browser at the following URL:

https://pepc.nps.gov/closeProject.cfm?mode=view&projectId=11

Appendix B: Estimating Costs

The following examples are general guidelines and are to be used as a reference only.

Appendix C - Lookup Tables

One of the functions that a super user performs is lookup table maintenance. Adding, removing and updating NPS-specific selections in PEPC drop down list boxes keeps the application up-to-date and simple to maintain.

There are two types of lookup tables – those that are park-specific and those that apply service-wide. Park-specific lookup tables can be edited by a Park Admin or Regional Admin. Service-Wide lookup tables can only be edited by a Superuser.

Park-Specific Lookup Tables

Park-specific lookup tables are accessed from the dropdown lists and buttons in the Park column of the Lookup Table List page. Park-specific lookup tables exist for all selections with the exception of **Link Category**. The following steps are used to access a park-specific lookup table:

STEP 1. Click on the **Admin** link in the main navigation.
STEP 2. Click on **Lookup Tables** in the left navigation.
STEP 3. For each look up table, select the park from the list box. Click **Go.**

Service-Wide Lookup Tables

Service Wide lookup tables are accessed from the Edit links in the Service-Wide column of the Lookup Table List page. Service-wide lookup tables exist for the Codes, Division, Funding Source, Link Category, and Responsibility Type selections.

Codes

The **Codes** lookup table includes national and park level codes that can be applied to a public comment. If you enter a code for a park it will be available for use on all projects associated with the park. To add a code:

STEP 1. Add a code using the following fields:

Field Label	Notes
Code	Enter the numeric or alphanumeric code. To group similar codes or sub codes together you may want to use an alphanumeric code where the letters represent the grouping and the numbers show the hierarchy. For example: WA1000 Water Accessibility and WA1100 Water Accessibility: Boats.
Name	Enter the title or description of the code.

STEP 2. Click **Add Code**. The code appears in the **Code List** table. Once added, if you need to deactivate the code, deselect the **Active** check box. If you deactivate a code, it is no longer available for use when coding public comments.
STEP 3. Click **Save** to save changes and return to the **Lookup Table List** page.
--OR--
Click **Cancel** to exit without saving and return to the **Lookup Table List** page**.**

Division

The **Division** lookup table includes national and park level divisions that can be associated with a project. If you enter a division for a park it will be available for use on all projects associated with the park. To add a division:

STEP 1. Add a division using the following field:

Field Label	Notes
Division*	Enter the division title (required).

STEP 2. Click **Add Division**. The division appears in the **Division List** table. Once added, if you need to deactivate the division, deselect the **Active** check box. If you deactivate a division, it is no longer available for use.
STEP 3. Click **Save** to save changes and return to the **Lookup Table List** page.
--OR--
Click **Cancel** to exit without saving and return to the **Lookup Table List** page**.**

Funding Source

The **Funding Source** lookup table includes national and park level funding sources that can be associated with a project. If you enter a funding source for a park it will be available for use on all projects associated with the park. To add a funding source:

STEP 1. Add a funding source using the following fields:

Field Label	Notes
Funding Source*	Enter the title of the funding source (required).
Code*	Enter the numeric or alphanumeric code for the funding source (required).

STEP 2. Click **Add Funding Source**. The funding source appears in the Funding Source List table. Once added, if you need to deactivate the funding source, deselect the Active check box. If you deactivate a funding source, it is no longer available for use.
STEP3. Click **Save** to save changes and return to the Lookup Table List page.
--OR--
Click **Cancel** to exit without saving and return to the Lookup Table List page.

Historical Resources

The **Historical Resources** lookup table includes national and park level historical resources that are viewable from the **National Historic Preservation Act** page. To add a historical resource:

STEP 1. Add a historical resource using the following field:

Field Label	Notes
Historical resource*	Enter the title of the historical resource (required).

STEP 2. Click **Add Historical Resource**. The historical resource appears in the Historical Resource List table. Once added, if you need to deactivate the historical resource, deselect the Active check box. If you deactivate a historical resource, it is no longer viewable.
STEP 3. Click **Save** to save changes and return to the **Lookup Table** List page.
--OR--
Click **Cancel** to exit without saving and return to the **Lookup Table** List page.

Link Category

The **Link Category** lookup table is only accessible to a Superuser. The **Link Category** lookup table controls the categories that are available for links on the PEPC private site under **Tools** and the PEPC public site under **Links** in the main menu. To add a link category:

STEP 1. Add a link category using the following fields:

Field Label	Notes
Type*	Select Public or Private (required).
Link category*	Enter the title of the link category (required).

STEP 2. Click **Add Link Category**. The link category appears in the **Link Category List** table under the selected type. Once added, if you need to deactivate the link category, deselect the **Active** check box. If you deactivate a link category, it is no longer viewable.
STEP 3. Click **Save** to save changes and return to the **Lookup Table List** page.

--OR--
Click **Cancel** to exit without saving and return to the **Lookup Table List** page**.**

NEPA/NHPA Specialists

The NEPA/NHPA Specialist lookup table includes park level NEPA/NHPA Specialists that can be associated with a project. If you enter a NEPA/NHPA Specialist for a park it will be available for use on all projects associated with the park. To add a NEPA/NHPA Specialist:

STEP 1. Add a NEPA/NHPA Specialist using the following fields:

Field Label	Notes
Type*	Select the type of specialist (required).
Specialist*	Enter the name of the individual who is the NEPA/NHPA Specialist for the park using the Person Search feature (required). To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.

STEP 2. Click **Add Specialist**. The NEPA/NHPA Specialist appears in the **NEPA/NHPA Specialist** table under the specified **Type**. Once added, if you need to delete the NEPA/NHPA Specialist, select the **Delete** check box. If you delete a NEPA/NHPA Specialist, that person is no longer available for selection. The checked NEPA/NHPA Specialist will be deleted when the page is saved.
STEP 3. Click **Save** to save changes and return to the **Lookup Table List** page.
--OR---
Click **Cancel** to exit without saving and return to the **Lookup Table List** page**.**

Park

The **Park** lookup table allows you to add/modify the park URL, Superintendent, and e-mail notification recipients. To update information for a Park:

STEP 1. Update information for a Park using the following fields:

Field Label	Notes
Public URL	Enter the URL for the Public Park Home Page.
Superintendent	Enter the name of the Superintendent using the Person Search feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Field Label	**Notes**

Immediate Attention Request Recipient	Enter the name of the Superintendent using the Person Search feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.
Unaddressed Request Recipient	Enter the name of the Superintendent using the Person Search feature. To add a name by using the **Person Search** feature: 1. Click on the binoculars icon. A separate **Person Search** window appears. 2. Search for the name of the person that you wish to use. a. Enter all or part of the Last Name (required). b. Enter all or part of the First Name or leave blank. 3. Click **Search.** 4. Click in the radio button associated with the name you wish to use. a. If you do not see the name you wish to use in the **Search Results** table, continue by entering identifying information under the heading **Add Person**. In the fields provided, enter First Name* (Required), Middle Initial (MI), Last Name * (Required), E-mail Address* (Required), Telephone, and Extension. b. Click **Add Person** 5. Click **Select.** The person's name appears on the form in the name field.

TIP: See Appendix A: E-mail Notification for more information regarding notifications.

STEP 2. Click **Save** to save changes and return to the Lookup Table List page.

--OR--

Click **Cancel** to exit without saving and return to the Lookup Table List page.

Responsibility Type

The **Responsibility Type** lookup table includes national and park level responsibility types that are available when entering Interdisciplinary Team Members for a project. If you enter a responsibility type for a park it will be available for use on all projects associated with the park. To add a responsibility type:

STEP 1. Add a Responsibility Type using the following field:

Field Label	Notes
Responsibility*	Enter the title of the Responsibility (required).

STEP 2. Click **Add Responsibility**. The Responsibility appears in the **Responsibility List** table. Once added, if you need to deactivate the responsibility, deselect the **Active** check. If you deactivate a responsibility, it is no longer available for use.

STEP 3. Click **Save** to save changes and return to the **Lookup Table List** page.

--OR--

Click **Cancel** to exit without saving and return to the **Lookup Table List** page.

Appendix D - Roles and Permissions

Superuser

A **Superuser** is able to perform all functionality in PEPC.

General

A **General** user may edit his/her own user profile and view project details for all projects in PEPC. A **General** user may have access to additional functionality with one or more of the following roles:

- **Park General User** is able to edit any project, *excluding* project information that is posted to the public, within the park with which they are associated.
- **Park Public Info User** is able to edit any project, *including* project information that is posted to the public, within the park with which they are associated.
- **Park Administrator** may create and edit users as well as edit any project, including project information that is posted to the public, within the park with which they are associated.
- **Internal Document Reviewer** may create and edit comments on internal documents within the park with which they are associated. All other project information will be read only.
- **Region User** has the same abilities as the **Park General User** for all parks within the region with which they are associated.
- **Region Administrator** has the same abilities as the **Park Administrator** for all parks within the region with which they are associated.

Limited Access

A **Limited Access** user does not have access to any functionality without an assigned role. A **Limited Access** user may have one or more of the following roles:

- **General Contractor** may edit his/her own profile and *view* information for a specific project with the exception of funding information.
- **Contractor User** may edit his/her own profile and *edit* information for a specific project with the exception of funding information.

Appendix E - Glossary

A

ACHP (Advisory Council for Historic Preservation)

The Advisory Council on Historic Preservation (ACHP) is an independent Federal agency that promotes the preservation, enhancement, and productive use of our Nation's historic resources, and advises the President and Congress on national historic preservation policy. The ACHP was established in 1966 by the National Historic Preservation Act (NHPA). More information on the ACHP can be found here: http://www.achp.gov/.

ARCH

Archeological study

ARPA (Archeological Resources Protection Act of 1979)

ARPA prohibits unauthorized excavation on Federal and Indian lands, establishes standards for permissible excavation, prescribes civil and criminal penalties, requires agencies to identify archeological sites, and encourages cooperation between Federal agencies and private individuals.

B

C

CA (Cooperating Agency)

For more information, refer to Memorandum No. ESM02-2 Cooperating Agencies in Implementing the Procedural Requirements of the National Environmental Policy Act.

CE (Categorical Exclusion)

Categorical Exclusions apply to actions that would not, under normal circumstances, individually or cumulatively have a significant impact on the environment. A CE may be upgraded to an EA for unusual or extraordinary circumstances.

CEQ (Council on Environmental Quality)

Congress established the Council on Environmental Quality within the Executive Office of the President as part of the National Environmental Policy Act of 1969 (NEPA). Additional responsibilities were provided by the Environmental Quality Improvement Act of 1970. CEQ coordinates federal environmental efforts and works closely with agencies and other White House offices in the development of environmental policies and initiatives. In addition, CEQ reports annually to the President on the state of the environment; oversees federal agency implementation of the environmental impact assessment process; and acts as a referee when agencies disagree over the adequacy of such assessments. More information on the CEQ may be found here: http://www.whitehouse.gov/ceq/

Concern

A concern is a statement that summarizes the interpreted voice of the public.

Cooperating Agency

A federal agency other than the one preparing the NEPA document (lead agency) that has jurisdiction over the proposal by virtue of law or special expertise and that has been deemed a cooperating agency by the lead agency.

State or local governments, and/or Indian tribes, may be designated cooperating agencies as appropriate (see 1508.5 and 1502.6).

D

Determination of Effect

A finding that determines whether a proposed project affects a property included on or eligible for the National Register of Historic Places.

DEIS (Draft Environmental Impact Statement) E EA (Environmental Assessment)

A brief NEPA document that is prepared to (a) help determine whether the impact of a proposal or alternatives could be significant; (b) aid NPS in compliance with NEPA by evaluating a proposal that will have no significant impacts, but that may have measurable adverse impacts; or (c) evaluate a proposal that either is not described on the list of categorically excluded actions, or is on the list but exceptional circumstances (section 3.5) apply.

E

EIS (Environmental Impact Statement)

An EIS is prepared when a proposed action or alternative has the potential for significant effect on the human environment.

EQD (Environmental Quality Division)

ESA (Endangered Species Act)

ESF (Environmental Screening Form) F Filter

A filter is a mechanism to limit the amount of data that is returned in a list or report.

F

FMSS (Financial Management Systems Software)

FMSS is a facility management software program with a web-based user interface and an underlying Oracle database. Used by NPS and other federal agencies (e.g. U.S. Army Corp of Engineers), to track work orders and maintenance activities at facilities.

NPS uses the web application to enter, update and review budget information, work completion milestones, costs and invoices, material schedules, and other information related to Park improvements.

FONSI (Finding of No Significant Impact)

A determination based on an EA and other factors in the public planning record for a proposal that, if implemented, would have no significant impact on the human environment.

FWS (United States Fish & Wildlife Service)

The U.S. Fish and Wildlife Service is a bureau within the Department of the Interior. Among its key functions, the Service enforces Federal wildlife laws, protects endangered species, manages migratory birds, restores nationally significant fisheries, conserves and restores wildlife habitat such as wetlands, and helps foreign governments with their international conservation efforts. More information on the FWS can be found here: http://www.fws.gov/.

G

GPRA (Government Performance and Results Act)

The purpose of the Government Performance and Results Act of 1993 (GPRA or the Results Act) is to hold agencies accountable for program performance by requiring that they think strategically and set, measure and report on goals annually.

H

I

IDT Member (Inter Disciplinary Team Member)

The IDT is used to identify issues or environmental problems that need to be addressed to reach park goals and objectives and resolve need for action. This is often the beginning of internal scoping, and it should involve a site visit (or familiarity of team members with the site) and discussions with appropriate agencies. The Environmental Screening Form (ESF) may serve as a guide in determining affected resources.

Internal Scoping

Internal scoping is simply the use of NPS staff (at the SSO, regional, park, or National Program Center level) to decide what needs to be analyzed in a NEPA document. It is an interdisciplinary process, and at a minimum it should be used to define issues, alternatives, and data needs. The IDT may also be used to formulate purpose and need; brainstorm any connected, similar, or cumulative actions associated with a proposal; decide on an appropriate level of documentation; put together a public involvement strategy; and decide other features of the overall NEPA process. According to the CEQ elements of scoping (1501.7), internal scoping should be used to:

- Eliminate issues that are not important.
- Allocate assignments among park IDT members or other participating agencies.
- Find/read any other NEPA documents related to this one.
- Identify any other permits, surveys, or consultations required by other agencies.
- Create a schedule that allows plenty of time to do NEPA well before a decision on the proposal is required.

J

K

L

M

Memo to File

A memo to the planning record or statutory compliance file that NPS offices may complete when (a) NEPA has already been completed in site-specific detail for a proposal, usually as part of a document of larger scope, or (b) a time interval has passed since the NEPA document was approved, but information in that document is still accurate.

Mitigation

A mitigation is a modification of the proposal or alternative that lessens the intensity of its impact on a particular resource.

MOA (Memorandum of Agreement)

A document executed by consulting parties pursuant to the Section 106 review process that sets forth terms for mitigating or eliminating adverse effects on historic properties resulting from agency action.

N

NEPA (National Environmental Policy Act)

NEPA is a procedural law (vs. a substantive law) to establish a national policy for the environment, to provide for the establishment of a CEQ, and other purposes. By nature of being a procedural law, an agency is free to select any alternative for implementation regardless of the severity of environmental impacts, as long as the procedural requirements have been followed in good faith and the resulting decision is "well reasoned" and based on full and appropriate disclosure of environmental impacts.

Substantive environmental laws usually have regulatory agencies with authority to enforce compliance. Penalties for substantive laws involve injunctions and often civil and criminal penalties. Most lawsuits involve one or more NEPA violations; which introduce delay through injunction (the requirement to do or refrain from doing a specific act) and one or more substantive law violations.

NEPA Document

A Categorical Exclusion (CE), Environmental Assessment (EA), Finding of No Significant Impact (FONSI), Draft and Final Environmental Impact Statements (EIS), Record of Decision (ROD), or other document prepared in compliance with the National Environmental Policy Act (NEPA).

NHPA (National Historic Preservation Act)

An Act to establish a program for the preservation of additional historic properties throughout the nation, and for other purposes. The full text of the Act can be found at: http://www2.cr.nps.gov/laws/NHPA1966.htm.

NMFS (National Marine Fisheries Service)

More information on the NMFS can be found here: http://www.nmfs.noaa.gov/.

NOA (Notice of Availability)

Separate notices submitted to the Federal Register that the draft EIS and the final EIS are ready for distribution.

NOI (Notice of Intent)

The notice submitted to the Federal Register that an EIS will be prepared. It describes the proposed action and alternatives, identifies a contact person in NPS, and gives the time, place, and descriptive details of the agency's proposed scoping process.

O

P

Planning Documents

NEPA documents posted for public review and comment.

PMIS (Project Management Information System)

Project Management Information System (PMIS) is a service wide intranet application within the National Park Service (NPS) to manage information about requests for project funding. It enables parks and NPS offices to submit project proposals to be reviewed, approved and prioritized at park units, regional directorates, and the Washington Office (WASO).

In response to a budget call for a particular NPS program for a specific fiscal year (FY), project proposals are submitted, reviewed, approved, prioritized and then formulated under an available funding source by utilizing PMIS. During formulation process for a budget call, a program manager at WASO or a budget officer at a regional directorate determines which project-funding requests meet the eligibility criteria for the call to be considered as part of the NPS Budget for a specific FY.

PMIS is a centralized web-based relational database.

Project Information

Project Information is information specific to a project, including meeting notices, status, announcements, etc.

Q

R

RD (Regional Director)

Response

A response is returned to each public individual or entity that submits comments or requests. When a concern is identified, it receives a code. There is one concern per code.

Request

A request is feedback received from the public that results in being added to a mailing list, receiving a certain document or announcement, etc.

ROD (Record of Decision)

The document that is prepared to substantiate a decision based on an EIS. It includes a statement of the decision made, a detailed discussion of decision rationale, and the reasons for not adopting all mitigation measures analyzed, if applicable.

S

Scoping

The procedure by which an agency identifies important issues and determines the extent of analysis necessary for an informed decision on a proposed action. Scoping, an integral part of environmental analysis, includes early involvement of interested and affected public, as well as internal and external agency contacts. Although formal scoping occurs for a specific time period, the EQD welcomes comments on projects while they are in the process of preparing plans.

Section 106 Assessment of Affect

Section 106 of NHPA requires federal agencies to consider the effects of their proposals on historic properties, and to provide state historic preservation officers, tribal historic preservation officers, and, as necessary, the Advisory Council on Historic Preservation a reasonable opportunity to review and comment on these actions. Section 106 review and NEPA are two separate, distinct processes. They can and should occur simultaneously, and documents can be combined, but one is not a substitute for the other. They should, however, be coordinated to avoid duplication of public involvement or other requirements. The information and mitigation gathered as part of the 106 review must be included in the NEPA document, and the 106 process must be completed before a FONSI or an ROD can be signed on a proposal that affects historic properties.

SHPO (State Historic Preservation Office)

T

THPO (Tribal Historic Preservation Office)

TIC (Technical Information Center)

TIC is a document management system that contains over 200,000 records that index and catalogue documents, monographs, engineering drawings, and images associated with Parks from 1880 – Present.
